The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Commerce Planet, Inc. business.

About Commerce Planet, Inc.

Commerce Planet, Inc., a media company, offers a line of products and services through its online club memberships as well as online tools and technology to create, manage, and maintain Web site solutions for eCommerce. It also provides businesses with lead generation and order acquisition services, graphic design, printing and fulfillment, as well as secure co-location and data hosting services.

The company offers media products, lead generation services and marketing tools to its client partners through a media solution.

Subsidiaries

The company's wholly owned subsidiaries include Consumer Loyalty Group, Inc.; Legacy Media, Inc.; OS Imaging, Inc.; and Interaccurate, Inc. Each subsidiary operates in the media industry. Their combined services are designed to address all the needs of their client partners including, membership loyalty offers, consumer marketing data management, affiliate list management, printing and fulfillment services, and Web/Data hosting and software development.

The Consumer Loyalty Group offers a suite of consumer loyalty based products. These

products encompass home based business opportunities, e-commerce retail sales, educational programs, financial programs and other high yield revenue producing offers. The products are utilized by its client partners.

Legacy Media is a service marketing company designed to address all of its client partner needs. There are four operating divisions of Legacy that focuses on the four main components of lead generation and order acquisition: media placement; list management; affiliate network management; and marketing tools. Legacy Media influences relationships with the other subsidiary companies to create and implement productive marketing campaigns on behalf of their client partners.

OS Imaging offers various services including graphic design, printing services, data merge, mailing and finishing. Graphic design and printing capabilities allow OS Imaging to assist their client partners in defining, developing, and creating the marketing message possible. OS Imaging offers various fulfillment services including: assembly; pick and pack; mailing and warehousing and inventory management services.

Interaccurate, Inc. designs and implements cutting-edge technology for secure electronic payment modules, advanced content search tools, and secure data hosting. Interaccurate also provides co-location services in its data center.

Products and Services

The company's membership-based Web site Onlinesupplier.com provides its customers access to various products and services. The company's services and capabilities include: Automated Webstore Generation and Customization; Merchant Processing Capabilities; Domain Name Registration; Online Training Modules (includes online auction training); and Web hosting.

As of December 31, 2005, the company stored approximately 450 products in its warehouse for distribution to customers.

The company provides access to approximately 30,000 products from its third party suppliers. Its Web site wholesales products in categories, including: Consumer Electronics; Audio/Video Equipment; Software; Home/Small Office Electronic Equipment; Automobile Accessories; Travel Accessories; and Networking Equipment.

Sales and Marketing

The company primarily markets its products throughout the United States.

Suppliers

The company's suppliers include My Computer Club, Inc.; West, Inc.; and InQ.

Customers

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
