Abstracts

Commercial Vehicle Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Commercial Vehicle Group Inc. and its competitors. This provides our Clients with a clear understanding of Commercial Vehicle Group Inc. position in the [Heavy Machinery Industry](#).

The report contains detailed information about Commercial Vehicle Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Commercial Vehicle Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Commercial Vehicle Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Commercial Vehicle Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Commercial Vehicle Group Inc. business.

About Commercial Vehicle Group Inc.

Commercial Vehicle Group, Inc. supplies integrated system solutions for the commercial vehicle market, including the heavy-duty truck market, the construction and agriculture markets, and the specialty and military transportation markets.

The company's products include static and suspension seat systems, electronic wire harness assemblies, controls and switches, cab structures and components, interior trim systems (including instrument panels, door panels, headliners, cabinetry, and floor systems), mirrors, and wiper systems specifically designed for applications in commercial vehicles.

Products

The company offers original equipment manufacturers (OEMs) a range of products and system solutions for various end market vehicle applications that include local and long-haul commercial truck, construction, bus, agricultural, military, end market industrial, marine, municipal, recreation, and specialty vehicle. A portion of its products are sold directly to OEMs as finished components, the company also supplies 'systems' or 'subsystems', which are groups of component parts located throughout the vehicle that

operate together to provide a specific vehicle function. Systems produced by the company include cab bodies, sleeper boxes, seating, trim, body panels, storage cabinets, floor covering, mirrors, windshield wipers, headliners, temperature measurement devices, and wire harnesses.

The company classifies its products into five general categories: seats and seating systems; electronic wire harnesses and panel assemblies; cab structures, sleeper boxes, body panels, and structural components; trim systems and components; and mirrors, wipers, and controls.

Seats and Seating Systems: The company designs, engineers, and produces seating systems primarily for heavy trucks in North America and for commercial vehicles used in the construction and agricultural industries through its European and Asian operations. The company offers a range of seats that include mechanical and air suspension seats, static seats and bus seats.

Heavy Truck Seats: The company produces seats and seating systems for heavy trucks primarily in its North American operations. Its heavy truck seating systems have a range of manual and power features, such as lumbar supports, cushion and back bolsters, and leg and thigh supports.

Construction and Other Commercial Vehicle Seats: The company produces seats and seating systems for commercial vehicles used in the global construction and agricultural, bus, military, commercial transport and municipal industries. The principal focus of these seating systems is durability. These seats are ergonomically designed for difficult working environments, to provide comfort and control throughout the range of seats and chairs.

Other Seating Products: The company also manufactures office seating products. Its office chairs are available in various colors and fabrics to suit different office environments, such as emergency services, call centers, receptions, studios, boardrooms, and general office.

Electronic Wire Harnesses and Panel Assemblies: The company produces a range of electronic wire harnesses and electrical distribution systems and related assemblies, as well as panel assemblies used in commercial vehicles and other equipment.

Electronic Wire Harnesses: The company offers a range of complex electronic wire harness assemblies that function as the primary current carrying devices used to

provide electrical interconnections for gauges, lights, control functions, power circuits, and other electronic applications on a commercial vehicle. Its wire harnesses are highly customized to fit specific end-user requirements. The company provides its wire harnesses for various commercial vehicles, tactical vehicles, specialty trucks, automotive, and other specialty applications, including heavy construction and forestry machines and mining trucks.

Panel Assemblies: The company assembles integrated components, such as panel assemblies and cabinets for commercial vehicle OEMs and other heavy equipment manufacturers. The panels and cabinets the company assembles are installed in key locations on a vehicle or u

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
