Abstracts

Commodore Applied Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Commodore Applied Technologies Inc. and its competitors. This provides our Clients with a clear understanding of Commodore Applied Technologies Inc. position in the Industry.

The report contains detailed information about Commodore Applied Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Commodore Applied Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Commodore Applied Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Commodore Applied Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Commodore Applied Technologies Inc. business.

About Commodore Applied Technologies Inc.

Commodore Applied Technologies, Inc. operates as an environmental solutions company. The company offers a range of environmental and technical services to the public and private sectors.

The company provides services related to environmental management for on-site and off-site identification, investigation remediation and management of hazardous, mixed and radioactive waste; and remediating contamination in soils, liquids and other materials and disposing of or reusing certain waste by-products by utilizing its Solvated Electron Technology (SET).

Segments

The company has operations in two segments. These two segments are as follows:

Commodore Advanced Sciences, Inc. primarily provides various environmental and regulatory compliance services to Government agencies on a fixed rate and lump sum basis.

Commodore Solutions, Inc. commercializes technologies to treat mixed and hazardous wastes, principally the company's SET technology.

Commodore Advanced sciences, Inc. - Environmental Management

The company, through Commodore Advanced Sciences, Inc. (Advanced Sciences), provides specialized technical and project management products and services primarily to government-sector customers, including the Department of Energy (DOE) and the Department of Defense (DOD), and also to private-sector domestic industrial customers. Advanced Sciences engages in all aspects of environmental regulation and compliance, as well as access to technologies and skills related to the identification, investigation, remediation and management of hazardous, mixed and radiological waste sites.

Advanced Sciences also sells safety, protective and technical equipment used by its customers and hazardous material handlers.

Services

Environmental Services: Advanced Sciences specializes in environmental characterization, regulatory compliance technical support and waste management services. Advanced Sciences qualifies as a small business under seven NAICS codes.

Advanced Sciences program management and technical services include: environmental site restoration planning, D & D planning & implementation support, preliminary assessments/site investigations, waste minimization, environmental audits & assessments, health & safety oversight & planning, underground-storage-tank site investigation, biological sampling and characterization, environmental impact assessments & statements & remediation, structural engineering analysis, remedial investigations/feasibility studies, deconstruction planning, environmental pollution control, regulatory compliance, hazardous, radioactive, toxic & mixed-waste, federal & state agency coordination management including treatment, public involvement support, and hazardous waste site remediation.

Remediation Services: After an environmental problem is identified, Advanced Sciences offers alternative remediation approaches that may involve providing on-site waste containment or management of on-site/off-site remediation and waste removal. Advanced Sciences can also redesign its customers' ongoing production processes and

develop technical specifications to minimize or eliminate the generation of hazardous waste.

Technical Services: Advanced Sciences has access to the SET technology and all its derivatives.

Commodore Solution Technologies, Inc. - Decontamination

The company, through Commodore Solutions, Inc. (Solutions), develops and commercializes its patented process known as SET. SET is capable of treating and decontaminating soils and other materials, including sludges, sediments, oils and other hydrocarbon liquids, metals, clothing and porous and non-porous structures and surfaces by destroying PCBs, pesticides, dioxins, chlorinated substances and other toxic contaminants.

Markets and Customers

The company markets its services and technologies to governmental and industrial customers throughout the United States. Additionally, the company's technologies also have application to similar customers in markets abroad, particularly in Eastern Europe and the Middle East. In 2008, its major customer was Bechtel Jacobs Company LLC.

Competition

Environmental Management: The company, in the hazardous waste management market, competes with firms as Energy Solutions, Jacobs Engineering, Science Applications International Corp., CH2M Hill and CDM. In providing environmental impact assessment services, Commodore Advanced Sciences' principal competitors in this market sector include RSI, North Wind, Stoller, Weston Solutions, The Earth Technology Corp., Battelle, URS and Woodward-Clyde.

Decontamination: The company's competitors include Energy Solutions, Pacific EcoSolution, and American Ecology, as well as other treatment companies such as PermaFix. The company also competes with companies that are engaged in providing incineration and other conventional technologies in decontaminating chemical weapons and warfare agents, concentration of nuclear wastes and the decontamination of military vessels and other hardware, such as Raytheon Corporation (the general contractor for the Johnston Atoll incinerator), EG&G, Inc. (the general contractor for the Tooele Army Depot), Mason and Hanger (the general contractor for the Newport News Naval Facility), Waste Management Corporation (a bidder for domestic 'large burial' stockpile

weapons decontamination), and others, including Browning-Ferris Industries, Inc., Jacobs Engineering, Inc., Fluor Daniel Corporation and Lockheed Martin Marietta Corporation.

History

Commodore Applied Technologies, Inc. was founded in 1996.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
