The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Compass Diversified Holdings business.

## **About Compass Diversified Holdings**

Compass Diversified Holdings engages in the acquisition and management of middle market businesses based in North America.

### **Segments**

As of June 30, 2007, the company had six reportable business segments.

Compass AC Holdings, Inc. (ACI), an electronic components manufacturing company, provides prototype and quick-turn printed circuit boards. ACI manufactures and delivers custom printed circuit boards to over 8,000 customers in the United States.

Aeroglide Corporation (Aeroglide) is a designer and manufacturer of industrial drying and cooling equipment. Aeroglide provides specialized thermal processing equipment designed to remove moisture and heat as well as roast, toast and bake a range of processed products. Its machinery includes conveyer driers and coolers, impingement driers, drum driers, rotary driers, toasters, spin cookers and coolers, truck and tray driers and related auxiliary equipment and is used in the production of a range of human foods, animal and pet feeds and industrial products.

Anodyne Medical Device, Inc (Anodyne), a medical support surfaces company, manufactures patient positioning devices primarily used for the prevention and treatment of pressure wounds experienced by patients with limited or no mobility.

CBS Personnel Holdings, Inc. (CBS), a human resources outsourcing firm, provides temporary staffing services in the United States. CBS serves approximately 4,000 corporate and small business clients. CBS also offers employee leasing services, permanent staffing and temporary-to-permanent placement services.

Halo Branded Solutions, Inc. (Halo), operating under the brand names of Halo and Lee Wayne, serves as a provider of design, sourcing, management and fulfillment services across all categories of its customer promotional product needs.

Silvue Technologies Group, Inc. (Silvue), a hard-coatings company, develops and produces proprietary, liquid coating systems used in the high-end eye-ware, aerospace, automotive and industrial markets. Silvue has sales and distribution operations in the United States, Europe and Asia as well as manufacturing operations in the United States and Asia.

#### Disposition

In January, 2007, the company sold its majority owned subsidiary, Crosman.

#### History

The company was incorporated in 2005. It was formerly known as Compass Diversified Trust and changed its name to Compass Diversified Holdings in September 2007.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
