Abstracts

Computer Programs & Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Computer Programs & Systems Inc. and its competitors. This provides our Clients with a clear understanding of Computer Programs & Systems Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Computer Programs & Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Computer Programs & Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Computer Programs & Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Computer Programs & Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Computer Programs & Systems Inc. business.

About Computer Programs & Systems Inc.

Computer Programs and Systems, Inc., a healthcare information technology company, engages in the design, development, marketing, installation, and support of computerized information technology systems to meet the demands of small and midsize hospitals. The company's target market includes acute care community hospitals with 300 or fewer beds and small specialty hospitals.

The company provides software and hardware products, complemented by data conversion, complete installation and support. Its enterprise-wide system automates the management of clinical and financial data across the primary functional areas of a hospital. It serves approximately 650 hospital customers across 47 states and the District of Columbia.

Products and Services

Software Systems

The company offers a range of software applications designed to streamline the flow of

information to the primary functional areas of community hospitals in one fully integrated system. Its software applications provide automated processes that improve clinical workflow and support clinical decision-making; allow healthcare providers to access the patient medical data to improve the quality of care and patient safety; integrate clinical, financial and patient information to promote use of time and resources, and eliminating dependence on paper medical records; provide tools that permit healthcare organizations to analyze past performance, model new plans for the future and measure and monitor the effectiveness of those plans; provide for implementation, whether through the installation of an in-house system or through its application service provider (ASP) services; and increase the flow of information by replacing centralized and limited control over information with access by clinical and administrative personnel to data relevant to their functional areas.

The company's software applications are grouped for support purposes according to various functional categories, including Patient Management, Financial Accounting, Clinical, Patient Care, and Enterprise Applications.

Patient Management: The company's patient management software enables a hospital to identify a patient at any point in the healthcare delivery system and to collect and maintain patient information throughout the entire process of patient care on an enterprise-wide basis. The single database structure of its software permits authorized hospital personnel to simultaneously access appropriate portions of a patient's record from any point on the system. The patient management software performs various functions, including registration, patient accounting, health information management, patient index, electronic claims processing, and medical practice management.

The company also offers various optional products that may be purchased as part of its core patient management suite, including enterprise wide scheduling, contract management, and quality improvement.

Financial Accounting: The company's financial accounting software provides various business office applications designed to track and coordinate information needed for managerial decision-making.

The company's financial accounting software summarizes daily financial transactions regarding patient revenues, receipts, census statistics and billing information for ready access by hospital administrators; provides financial information generated from daily hospital operations; formats financial statements to the specifications of each user and is able to generate up to 999 different user-defined reports; processes vendor invoices

and payments and their related general ledger entries; calculates all employee wages and benefits for an unlimited number of salaried and hourly employees; allocates employee time to user-defined cost centers; uses touch screen time clocks to eliminate manual time entry; and reduces effort of gathering employee time data and increases access of managers to such data;

The company's financial accounting software also makes time records more accurate by identifying employees through bar-coding and optional biometric fingerprint technology; provides for computerized bank deposits to meet payroll and accou

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
