Abstracts

Computer Sciences Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Computer Sciences Corporation and its competitors. This provides our Clients with a clear understanding of Computer Sciences Corporation position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Computer Sciences Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Computer Sciences Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Computer Sciences Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Computer Sciences Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Computer Sciences Corporation business.

About Computer Sciences Corporation

Computer Sciences Corporation operates in the information technology (IT) and professional services industry. The company's service offerings include IT and business process outsourcing, and IT and professional services.

The company's outsourcing service involves operating all or a portion of a customer's technology infrastructure, including systems analysis, applications development, network operations, desktop computing, and data center management. It also provides business process outsourcing, managing key functions for clients, such as procurement and supply chain, call centers and customer relationship management, credit services, claims processing, and logistics.

The company's IT and professional services include systems integration, consulting, and other professional services. Systems integration encompasses designing, developing, implementing and integrating information systems. Consulting and professional services includes advising clients on the strategic acquisition and utilization of IT and on business strategy, security, modeling, simulation, engineering, operations, change management, and business process reengineering.

The company also licenses software systems for the financial services and other industry-specific markets and provides an array of business solutions that meet the needs of commercial and government clients.

Markets

The company provides its services to clients in domestic and international commercial industries and to the U.S. federal, state, and foreign governments. It targets the delivery of these services within three service lines or sectors: North American Public Sector (NPS), Managed Services Sector (MSS), and Business Solutions and Services (BSS). Geographically, it has major operations throughout North America, Europe, and the Asia-Pacific region, including India and Australia.

The company's NPS line of business, providing IT services to the U.S. federal government, is a federal contractor and IT service provider. It serves a federal customer base, including civil departments and branches of the military, as well as the Department of Homeland Security. The company provides a spectrum of services to the U.S. federal government, ranging from traditional systems integration and outsourcing to complex project management and technical services. Key offerings include enterprise modernization, telecommunications and networking, managed services, base and range operations, and training and simulation.

The company's MSS line of business provides information systems outsourcing services to clients in an array of industries, including aerospace and defense, automotive, chemical and natural resources, consumer goods, financial services, healthcare, manufacturing, retail and distribution, telecommunications, and technology.

The company's BSS line of business also serves an array of industries, providing industry specific consulting and systems integration services, business process outsourcing, and intellectual property-based software solutions. In addition, BSS provides professional technology staffing services in Australia, computer equipment repair and maintenance services in Asia, and credit reporting services in the United States.

Significant Events

On June 21, 2010, Computer Sciences Corporation and Honeywell Technology Solutions Inc. have established InSpace 21 LLC, a joint venture that is dedicated to providing integrated operations support to the U.S. Air Force space community.

On August 26, 2010, Computer Sciences Corporation announced it is expanding its alliance with the Virtual Computing Environment coalition (VCE), an unprecedented collaboration of Cisco Systems, Inc. and EMC Corporation with VMware, Inc. to develop a global solutions unit and create centers of excellence based on VCE's Vblock infrastructure.

On December 09, 2010, ActivePath Ltd. and Computer Sciences Corporation announced the formation of a strategic integration alliance. The agreement includes CSC integrating ActivePath's 2Way Email Banking Systems for banks and financial institutions in various continental European countries: France, Belgium, Luxembourg, Spain, Italy, and Portugal.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
