The Comstock Mining, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Comstock Mining, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Comstock Mining, Inc. business.

About Comstock Mining, Inc.

Comstock Mining Inc. operates as a precious metals mining company in North America. The company operates gold and silver test mine in northern Nevada. As of December 31, 2009, the company had drilled 182 holes at the Lucerne / Hartford Complex at its Comstock Project.

Comstock Lode Project

The company owns or leases various mineral exploration projects, including The Comstock gold and silver exploration and test mining project, the Spring Valley and Gold Canyon placers project, the Como mineral claims, and the Big Mike copper project. The company's Comstock Lode Project is located in Storey and Lyon Counties, Nevada.

The company's property rights to the mineral estate of the Comstock Lode Project consist of several mineral leases, various unpatented mineral claims, and fee ownership of real property.

Spring Valley Project (South Comstock)

The company owns a 100% interest in the 25 federal unpatented placer claims located in Lyon County, Nevada known as the Gold Canyon and Spring Valley claims.

Michael & Kathryn S. Dondero lease:

The company has a mineral exploration and mining lease agreement with Michael & Kathryn S. Dondero covering seven patented claims located in Lyon County. The lease remains in effect for as long as exploration, development, mining, or processing operations are conducted on a continuous basis.

The Como Project

The company owns a 100% interest in the 8 unpatented lode mining claims, covering an area of approximately 168 acres in Lyon County, Nevada, that comprise the Como Project.

Big Mike Copper Project

The company owns a 100% interest in the 17 unpatented lode claims and 1 placer claim, covering a total of approximately 310 acres in Pershing County, Nevada, that consist of the Big Mike Copper property. The property is situated at an elevation of 5,000 to 5,500 feet.

Significant Events

On July 20, 2010, the company has purchased 7 patented mining claims totaling 48 acres, surface rights to two additional patented mining claims totaling 15 acres, 12 unpatented lode claims, and 15 acre-feet of water rights, in Storey County, Nevada from the estate of William Michael Donovan Jr.

In November 2010, Comstock Mining Inc. acquired 26 unpatented lode-mining claims along the southern extension of the Occidental Lode structure in Storey County Nevada. The Occidental Lode is located 1.5 miles due east of and sub-parallel to the veins of the main Comstock Lode. The properties were acquired through a lease agreement with Renegade Mineral Holdings, LLC. The company's land position in the Comstock district totals approximately 6,412 acres, including 892 acres of patented mining claims, and 5,520 acres of unpatented claims administered by the Bureau of Land Management.

History

The company was incorporated in 1999. It was formerly known as GoldSpring, Inc. and changed its name to Comstock Mining Inc. on July 21, 2010.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
