Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Conforce International Inc. business.

### **About Conforce International Inc.**

Conforce International, Inc., through its subsidiary, Conforce 1 Container Terminals, Inc., operates a container terminal in Canada. The company also engages in the research and development of a polymer based composite shipping container and highway trailer flooring products.

#### Principal Products

##### Container Terminal Division

The company provides handling and storage of marine shipping containers to its client base of international shipping lines. The container depot has a capacity of approximately 5,000 containers.

##### EKO-FLOR Division

The company also involves in the production, development, and commercialization of the new certified container and trailer flooring system, EKO-FLOR. EKO-FLOR is a composite flooring system designed to replace plywood flooring in shipping containers

and highway trailers. EKO-FLOR xcs is the first version of the product developed. EKO-FLOR cs-2 is designed for use in general cargo applications. EKO-FLOR cs-4 contains a new anti-slip top coat surface jointly developed by it and Bayer MaterialScience AG. The EKO-FLOR cs-4 panels used for ocean-going trials are produced at its own development center in Concord, Ontario. EKO-FLOR ms-1 has been developed as a load bearing shelving system for use in special application United States military containers. EKO-FLOR xts is a variation of the cs-4 substrate developed for the highway trailer industry.

## Customers

The company intends to sell its products directly to International shipping lines and trailer manufacturers for use in newly manufactured containers and trailers through, either its internal sales staff, broker/selling agents, and military contractors (of which it has one in the U.S.A, Sea Box).

## Agreements

In 2009, the company signed a definitive agreement with Bayer MaterialScience LLC (Bayer) establishing a strategic partnership between the company and Bayer. The company and Bayer have collaborated on the design of the special application military container panels, EKO-FLOR xts trailer flooring and cs 4 container flooring.

## Competition

The company competes with ACS (Alrange Container Services); Musket Transport; and P&W Transport.

## History

Conforce International, Inc. was founded in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
