Abstracts

Continental Fuels, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Continental Fuels, Inc. and its competitors. This provides our Clients with a clear understanding of Continental Fuels, Inc. position in the Industry.

The report contains detailed information about Continental Fuels, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Continental Fuels, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Continental Fuels, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Continental Fuels, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Continental Fuels, Inc. business.

About Continental Fuels, Inc.

Continental Fuels, Inc., through its subsidiaries, engages in the purchase, transportation, storage, and resale of petroleum products in the United States and internationally.

Petroleum Products Resale and Blending Operations

The company's trading subsidiaries, US Petroleum Depot, Inc. and Continental Trading Enterprises, Inc., conduct its petroleum products storage, blending and purchase and sale operations.

US Petroleum Depot, Inc., held a long-term lease on a petroleum products terminal and storage facility located in Brownsville, Texas. The property consists of approximately 5.45 acres of real property and 6 oil storage tanks with an aggregate capacity of 62,000 barrels. U.S. Petroleum intends to use the Brownsville facility in the operation of its business of receiving, storing, and distributing petroleum products. US Petroleum completed the delivery of approximately 39,410 barrels of light crude product per month.

The company, through its subsidiary, Continental Trading Enterprises, Inc., conducts the petroleum products resale operations, which consist of the purchase and resale of

various petroleum products.

Petroleum Products Transportation Operations

The company, through its other operating subsidiary, Geer Tank Trucks, Inc., engages in the purchase, transportation, and sale of crude oil in the State of Texas. Geer Tank Trucks, Inc. operates out of five locations in the state of Texas. Geer Tank Trucks, Inc. owns two salt water disposal wells and four pipeline terminals with yards located in Jacksboro, Mineral Wells, Graham, Cisco, and Bowie, Texas. It also owns and operates approximately 20 tank trucks for transporting oil with capacities of 180 bbl, and approximately 50 frac tanks. In addition to oil shipping and trading, it provides oil well services, such as salt and fresh water removal services and frac tank rentals.

The company established a wholly owned foreign subsidiary, Agencia Fiduciaria Aequitas N.V. (Continental Fuels A.V.V.), in Aruba for the purpose of developing a presence in Latin America. Continental Fuels A.V.V. owns 75% of the equity of Combustibles Continental De LatinoAmerica (Combustibles). Combustibles was for the purposes of investment in the energy sector, the commercialization of hydrocarbon by-products, and the investment and financing of industrial projects and energy infrastructure.

History

Continental Fuels, Inc. was founded in 1989.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
