The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.
- Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Conversion Services International Inc. business.

About Conversion Services International Inc.

Conversion Services International, Inc., a technology and business process improvement/management company, provides professional services primarily in the northeastern United States.

Services

The company offers services in the following areas: strategic consulting, data warehousing, business intelligence, business process optimization, operational merger support, change management, lean and six sigma consulting, and data management consulting.

Strategic Consulting Services

Strategic Consulting involves planning and assessing both process and technology, performing gap analysis and making recommendations regarding technology and business process improvements.

Business and Process Consulting

Change Management Consulting – The company assists clients with implementing project management governance and practices for large scale change initiatives, including consolidations, conversions, integration of new business processes, and systems applications.

Integration Management, Mergers, and Acquisitions – The company works with clients to implement best practices for mergers and acquisitions. Support various aspects of the integration process from initial assessment through implementation support.

Acquisition Readiness – The company works with clients to prepare them for large scale acquisitions in the financial services domain. This includes building best practices, mapping, and gapping and implementing a roadmap to integrate multiple companies.

Process Improvement (Lean and Six Sigma) – The company provides an array of products and services in support of lean and six sigma, including training, process improvement, project management, and implementation support.

Regulatory Compliance (The Health Insurance Portability and Accountability Act of 1996, Basel II) – The company works with clients to analyze, design, and implement operational control, procedures, and business intelligence that would align the organization to meet new regulatory requirements.

Project Management (PMO) – PMO involves setting up an internal office at a client location, staffed with senior/certified project managers that act in accordance with the policies and procedures identified in its best practices for project management.

Request For Proposal Creation and Responses – The company gathers user and technical requirements and develop requests for proposals (RFP) on behalf of its clients.

Strategic Technology Consulting

Data Warehousing and Business Intelligence Strategic Planning – The company helps clients to develop a strategic roadmap to align with a data warehouse or business intelligence implementation. These engagements are focused on six strategic domains that have been identified and documented by CSI: business case, program formulation, organizational design, program methodologies, architecture and operations, and servicing.

Information Management Strategy & Roadmap – The company helps clients develop a roadmap to use and integrate enterprise information. The solution can support a business intelligence/data warehouse solution, rationalization of an environment, sun setting of old applications and migration to new applications.

Information Management Software Selection – The company evaluates, analyzes, and recommends appropriate software tools for deploying business intelligence/data warehousing solutions. Software evaluated and recommended include reporting, ad-hoc query, analytics, extract, transform and load processes (ETL), data profiling, database, and data modeling.

Business Intelligence

Business Intelligence is a category of applications and technologies for gathering, storing, analyzing, and providing access to data to help enterprise users make better and quicker business decisions.

Business Intelligence, Architecture and Implementation – The company develops architecture plans and install tools required to implement a business intelligence solution, including enterprise reporting, ad-hoc reporting, analytical views and data mining. Solutions are typically developed using tools, such as Cognos, Business Objects, MicroStrategy, SAS, and Crystal Reports.
