The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Coral Gold Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Coral Gold Resources Ltd. business.

About Coral Gold Resources Ltd.

Coral Gold Resources Ltd., an explorations stage company, engages in the exploration and development of natural resource properties in the States of Nevada and California in the United States. The company primarily focuses on the Robertson Mining Claims, in Nevada, United States.

Robertson Mining Claims, Nevada, U.S.A.

The Robertson Mining Claims are located in Crescent Valley, Nevada on the western flanks of the Shoshone Range. The Robertson Mining Claims comprise approximately 11,000 acres in the Bullion Mining District, Lander County, Nevada, and include 724 unpatented and patented lode and placer mining claims. The Robertson Mining Claims comprise 3 separate claim groups known as the Core Claims; the Carve Out Claims, and the Norma Sass and Ruf Claims.

Robertson Property: The Robertson Property is an advanced-stage gold exploration project located in eastern Lander County, Nevada. The core property consists of 556 unpatented federal lode claims, mill sites, placer claims and 9 patented lode claims covering approximately 8,500 acres of public lands. The company is record owner of 495 claims and controls an additional 61 claims through a series of mineral leases and

option agreements. Approximately 61 of the 495 of the claims that comprise the Robertson Property are controlled by the company through 6 mining leases and option agreements.

Carve-Out Claims, Nevada, U.S.A.: The company holds an undivided 61% interest and a 39% interest carried to production in the Carve-Out Claims.

Norma Sass and Ruf Claims, Nevada, U.S.A.: The company owns a 66.6% interest in the Norma Sass and Ruf Claims, which originally were a part of the Carve-Out Claims, after an option agreement with Levon Resources Ltd. (Levon) transferring to Levon a 33.3% interest in the Norma Sass and Ruf Claims.

The company has an exploration agreement with Agnico-Eagle. The agreement covers its the Norma Sass, Blue Nugget and Lander Ranch claims. The Norma Sass agreement also includes its partnership with Levon. Under the agreement, Agnico-Eagle can earn a 51% interest in the Norma Sass, Blue Nugget and Lander Ranch claims by completing at least 45,000 feet of exploration drilling and paying certain advance royalties.

In 2008, the company entered into an exploration, development and mine operating agreement with Barrick, wherein Barrick is granted the option to acquire approximately a 75% interest in its and Levon interests in the Norma Sass Property, Nevada, consisting of 36 unpatented mining claims.

June Claims: The company announced the completion of a mineral lease with option to purchase agreement to explore, develop, and exploit six lode mining claims located in Lander County, State of Nevada (the June Claims). The June Claims are adjacent to the company's View Claims in the northwest section of its Robertson Property.

JDN Claims, Nevada, U.S.A.: The company has 6 mining claims on 550 acres of land near Crescent Valley (Lander County), Nevada. The company located an additional 28 unpatented lode mining claims covering approximately 30 acres and has a 100% interest by staking the JDN Claims.

History

The company was founded in 1981. It was formerly known as Coral Gold Corp. and changed its name to Coral Gold Resources Ltd. in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
