Abstracts

Corn Products International Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Corn Products International Inc. and its competitors. This provides our Clients with a clear understanding of Corn Products International Inc. position in the [Food and Beverages](#) Industry.

The report contains detailed information about Corn Products International Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Corn Products International Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Corn Products International Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Corn Products International Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Corn Products International Inc. business.

About Corn Products International Inc.

Corn Products International, Inc., together with its subsidiaries, manufactures and sells ingredients to a variety of food and industrial customers. The company's products are derived primarily from the processing of corn and other starch-based materials, such as tapioca.

The company's sweetener products include high fructose corn syrup (HFCS), glucose corn syrups, high maltose corn syrups, caramel color, dextrose, polyols, maltodextrins and glucose, and corn syrup solids. The company's starch-based products include both industrial and food-grade starches.

Products

High Fructose Corn Syrup: The company primarily produce two types of high fructose corn syrup: HFCS-55, which is mainly used as a sweetener in soft drinks; and HFCS-42, which is used as a sweetener in various consumer products such as fruit-flavored beverages, yeast-raised breads, rolls, dough, ready-to-eat cakes, yogurt and ice cream.

Glucose Corn Syrups: Corn syrups are fundamental ingredients used in food products such as baked goods, snack foods, beverages, canned fruits, condiments, candy and other sweets, dairy products, ice cream, jams and jellies, prepared mixes and table syrups.

High Maltose Corn Syrup: This special type of glucose syrup has a carbohydrate profile, making it ideal for use as a source of fermentable sugars in brewing beers. High maltose corn syrups are also used in the production of confections, canning and some other food processing applications.

Dextrose: The company produces dextrose products that are grouped in three different categories - monohydrate, anhydrous, and specialty.

Polyols: These products are reduced calorie sweeteners primarily derived from starch. They include crystalline sorbitol, crystalline maltitol, mannitol, specialty liquid polyols and liquid sorbitol for the food, beverage, confectionary, industrial, personal and oral care, and nutritional supplement markets.

Maltodextrins and Glucose and Corn Syrup Solids: These products have a multitude of food applications, including formulations where liquid corn syrups cannot be used.

Starch Products: Starches are components in a range of processed foods, where they are used particularly as a thickener and binder. Cornstarch is also sold to cornstarch packers for sale to consumers. Starches are also used in paper production to produce a smooth surface for printed communications and to improve strength in recycled papers.

Co-Products and others: Refined corn oil (from germ) is sold to packers of cooking oil and to producers of margarine, salad dressings, shortening, mayonnaise and other foods. Corn gluten feed is sold as animal feed. Corn gluten meal is sold as high protein feed for chickens, pet food and aquaculture primarily, and steepwater is sold as an additive for animal feed.

Geographic Operations

The company's business includes regional operations in North America, South America, and Asia/Africa.

Customers

The company supplies a range of customers in approximately 60 industries.

Competition

The company's competitors include ADM Corn Processing Division (ADM) (a division of Archer-Daniels-Midland Company), Cargill, Inc., Tate & Lyle Ingredients Americas, Inc., and National Starch and Chemical Company (National Starch) (a subsidiary of Akzo Nobel N.V.). The company's operations in Mexico and Canada face competition from the U.S. imports and local producers including ALMEX, a Mexican joint venture between ADM and Tate & Lyle Ingredients Americas, Inc. In South America, Cargill and National Starch have corn-refining operations in Brazil.

History

Corn Products International, Inc. was founded in 1906.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
