The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of CornerWorld Corporation business.

About CornerWorld Corporation

CornerWorld Corporation, a marketing and technology services company, provides various products and services for the accessibility of content across mobile, television, and the Internet platforms in North America.

Business Segments

The company operates through three business segments: Direct Marketing Services, Communications Services, and Online Media Networks.

Direct Marketing Services

The Direct Marketing Services segment offers technology-oriented direct response marketing services. It primarily includes the activities of Enversa Companies and subsidiaries. The company offers various services for brand and direct response customer acquisition campaigns, including media buying and planning for online and mobile media. It provides customer relationship marketing and interactive services, as well as customer data collection and analysis tools used for planning and targeting client marketing efforts across a network of partner, representative and owned content sites, including CornerWorld.com. The company operates ad networks and a proprietary

request for proposal (RFP) technology that highlights promotional offers from various corporate clients.

Communications Services

The Communication Services segment provides shortcode application service to the wireless industry. It includes the activities of Ranger Wireless Group and T2 Group subsidiaries. The core service offered is 611 Roaming Service, a patented application providing means for connecting wireless subscribers to reach their home providers customer service call center while roaming on another provider's network. It also manages an online portal, which allows carriers access to their monthly statements and reporting on call volume to and from their company.

Through T2 Communications the company provides Internet Protocol Television (IPTV), Internet, and VoIP services. The company delivers technology to residential and business customers in Michigan. Primary offerings include: phone lines, Internet connections, 275 all-digital television stations, colocation, long distance, and toll-free services. The company operates as a competitive local exchange carrier (CLEC) that manages its own fiber to the premise (FTTP) network with a 10 gigabit backbone and up to 1 gigabit per second connections to end users.

Online Media Networks

This segment focuses on direct marketing that leverages its lead generation engine to garner qualified leads (consumers) for Fortune 1000 advertisers across social networking Websites, its own burgeoning music portal, and offline venues. The company through its subsidiary, CornerWorld, Inc., operates as an Interactive Media Company. The company operates www.cornerworld.com, which is a free, business management and social networking platform that empowers independent content creators to share and profit from their skills.

History

CornerWorld Corporation was founded in 2003.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
