The Corporate Executive Board Co. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Corporate Executive Board Co. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Corporate Executive Board Co. business.

About Corporate Executive Board Co.

The Corporate Executive Board Company delivers authoritative data, tools, and peer insights to enterprises. The company primarily delivers these products and services to a client base through annual, fixed-fee membership subscriptions. As of December 31, 2009, its member network included executives and professionals from approximately 50 countries and 4,800 institutions.

In February 2010, the company extended a collaboration agreement with The Advisory Board Company, entered into in 2007, to enhance services to members.

Products and Services

The company's products and services focus on five corporate functions. These corporate functions are: Finance, Strategy, and Operations; Human Resources; Information Technology; Legal and Compliance; and Sales, Marketing, and Communications. Its products and services enable to address critical issues, such as cost savings, risk management, employee engagement, communications, and corporate governance.

Best Practices Research and Solutions: The company analyze and document corporate best practices for significant and pressing issues that members confront. Through its proprietary research, the company identifies economic leverage points and isolates high return-on-investment solutions for members to implement. The company delivers this research through various channels, including Web-based resources, interactive workshops, live meetings, and published studies.

Active Executive Network: The company connects members to networks of peer executives and professionals across industries and geographies. These networks operate through in-person meetings and Web- and email-based platforms. In 2009, these networks supported approximately 1,000 virtual events for approximately 67,000 participants and 500 live meetings for approximately 9,500 attendees worldwide.

Proprietary Data Assets and Analytic Tools: The company provides members with tools and analysis that enable decision-making. Its diagnostic tool allows a member executive to understand how other executives assess the performance of their own department. In 2009, the company created approximately 100 analytical tools and approximately 400 benchmarking data sets.

Decision Support on Urgent Issues: The company delivers decision support and advice to members on time-sensitive issues.

Advisory Support: The company delivers a proprietary on site executive education curriculum to executives and their teams, supported through e-learning resources.

Sales and Marketing

The company sells products and services in approximately 50 countries.

Strategic Alliances

In April 2010, HighRoads, Inc. and the Corporate Executive Board Co. announced an alliance whereby they would combine real-time health care benefit data to analyze the effects of health care design changes as a result of health care reform.

History

The Corporate Executive Board Company was founded in 1979.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
