Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cosco Corp. (Singapore) Ltd. business.

About Cosco Corp. (Singapore) Ltd.

COSCO Corporation (Singapore) Limited operates as a ship repair, ship Building, and marine engineering company in China. The company also has activities in the dry bulk shipping, shipping agency, and other sectors.

Segments

The company has three main business units: Ship Repair, Ship Building & Marine Engineering; Dry Bulk Shipping; and Shipping Agency & Others.

Ship Repair, Ship Building, and Offshore Marine Engineering

The company's 51% owned subsidiary, COSCO Shipyard Group Co., Ltd, has six major shipyards in China - Dalian, Lianyungang, Nantong, Shanghai, Zhoushan and Guangdong. COSCO Shipyard Group provides various customized ship repair, ship building and marine engineering services which include new ship building, conversion, construction of barges and oil rigs, as well as the repair of ships and oil rigs.

Dry Bulk Shipping

The company's dry bulk shipping business is managed by its wholly-owned subsidiary, COSCO (Singapore) Pte Ltd. COSCO (Singapore)'s dry bulk shipping fleet transports cargo along the main trading sea routes from China to major ports in the U.S., Europe, South America and South Africa via Singapore. The company has a fleet of 12 dry bulk carriers, with a combined carrying capacity of 698,306 dwt. The carriers transport dry bulk cargo, such as iron ore, coal, steel, cement, and fertilizer. The ships are also chartered out to other ship owners and operators. The customer base is made up of major shipping companies based in countries, such as Germany, Norway, Denmark, Greece, Switzerland, the U.K. and the U.S.A.

Shipping Agency

The company's 70% owned subsidiary, COSTAR Shipping Pte Ltd, is a shipping agent. COSTAR Shipping provides agency services for full container and break-bulks, which include document preparation of bills of lading and delivery orders, collection of freight, cargo operation, vessel husbanding, customs declaration, port authority coordination, administration and settlement of cargo claims, transshipment management, bunkering services and container handling.

COSTAR Shipping's business mainly stems from containerization services for COSCO Container Lines' customers. Costar Shipping has the capabilities to transport various types of containers, including Outof- Gauge (OOG) containers, general purpose units (GP), reefer containers and hazardous containers from approximately 1,300 ports in approximately 160 countries.

In addition, COSTAR Shipping offers value-added services for instance, recommending trucking, freight forwarding, stuffing, container depot, and warehouse and storage services. In Malaysia, COSLINK (M) Sdn. Bhd. serves as the general shipping agent for the company's entire fleet of vessels that call at Malaysian ports and provides a similar range of services as COSTAR Shipping in Singapore.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
