Abstracts

Cover-All Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Cover-All Technologies Inc. and its competitors. This provides our Clients with a clear understanding of Cover-All Technologies Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Cover-All Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Cover-All Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Cover-All Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Cover-All Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cover-All Technologies Inc. business.

About Cover-All Technologies Inc.

Cover-All Technologies Inc., through its subsidiary, Cover-All Systems, Inc., provides software products and services for the property and casualty insurance industry primarily in the United States and Puerto Rico. Its software products and services focus on the functions required to underwrite, rate, quote, issue, print, bill, and support the entire lifecycle of insurance policies.

The company provides a range of professional services that support product customizations, conversion from existing systems, data integration with other software or reporting agencies and other technical services. It also offers ongoing support services, including incorporating new insurance rates, rules, and forms changes. These support services provide turnkey solutions to its customers as the company performs analysis, development, quality assurance, documentation, and distribution for delivering changes.

Products

My Insurance Center

My Insurance Center (MIC) is a customizable and configurable Web-based, data-centric 'hub and spoke' software platform built around a shared 'information hub' and suite of product components. MIC is designed for insurance agents, brokers, and carriers with integrated workflows and access to real-time information. MIC is designed to be the platform to serve players throughout the entire insurance value chain, including the insured, agents, brokers, insurance companies and reinsurers. MIC is scalable to serve both large and small organizations. MIC can be accessed over the Internet through a browser, with advanced security. MIC is designed to be deployed globally in the future to adapt to different languages and currencies and to support different insurance products in other countries.

MIC provides an integrated platform with baseline common insurance functions that can be customized by the company for customers' business needs. MIC also provides various configuration capabilities that are used by customers for further tailoring the application. MIC also allows end users to personalize screens and content for meeting their roles and responsibilities. MIC is designed to support STP (straight-through-processing). MIC enables its customers to utilize its rating, policy issuance, billing, and other software components into an integrated platform that eliminates redundant data entry. Information is stored in a client-centric database and becomes immediately available to other users or functions.

MIC Rating & Insurance – The Policy Rating and Issuance Component of MIC

The MIC Rating & Issuance component supports the following policy functions: data capture and editing; rating; policy issuance, including multiple recipient print; all policy transactions, including quotes, new lines, endorsements, renewals, audits, and cancellations; and statistical coding. MIC Rating & Issuance is designed to accommodate various lines of property and casualty insurance. The MIC Rating & Issuance product is in use in approximately 35 companies.

My Insurance Center – Functional Capabilities

The company has, through MIC, an inventory of insurance software components combined with an implementation platform. MIC includes the following critical components: my insurance center portal; enterprise, customer-centric oracle database; underwriting tools; end user access to information in real time – straight-through-processing; rating and issuance; full policy lifecycle support; clear and comprehensive data collection with real time edits; policy history – policy changes and useful for activities, such as coverage inquiries; on-line system, screen and field level look-ups; on-

line commercial lines manual tables and footnotes; direct system navigation; standard ISO (Insurance Service Office)/NCCI coverages and rates support; company customized coverages and rates support; automated recipient-driven issuance of insurance policies, worksheets, ID cards, including print preview; policy database; multiple company/program/state/coverage support; templates to reduce data entry time; advanced billing capabilities – integrating with NetSuite; claims repository; customer relationship management; agency and program management; advanced administration tools; access to Web services and information providers; policy dashboard – premium & loss information; advanced workflows, diaries; electronic underwriting files; compliance assist, help desk; interfaces to ‘back end’ accounting and reporting systems; policy-level premium and loss information for profitability tracking/accounting; and quote, binder, policy lifecycle support.

Customers

The company’s customers include insurance companies, agents, brokers, and managing general agents (MGAs). Its major customer is American International Group, Inc.

History

The company was founded in 1971. It was formerly known as Warner Computer Systems, Inc. and changed its name to Warner Insurance Services, Inc. in 1992. Further, it changed its name to Cover-All Technologies Inc. in 1996.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
