SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Creditriskmonitor.com Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Creditriskmonitor.com Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Creditriskmonitor.com Inc. business.

### **About Creditriskmonitor.com Inc.**

CreditRiskMonitor.com, Inc. operates as an Internet-based publisher of financial information designed specifically for corporate credit professionals. The company publishes commercial credit reports covering public companies worldwide, including detailed financial statements, ratio analysis and trend reports, peer analyses, Altman Z default scores, FRISK scores, credit limit recommendations, company background information, plus Moody's Investors Service (Moody's), and Standard & Poor's (S&P) ratings.

The company's service also includes trade payment data and public filings (suits, liens, judgments, and bankruptcy information) on millions of U.S. companies. In addition, the service provides continuous filtered news monitoring that keeps subscribers up to date on events affecting the creditworthiness of companies, including FRISK score reports, credit limit alerts, financial statement updates, SEC filings, Moody's and S&P rating changes, credit-relevant news stories, and press releases. The company has contractual agreements with its data suppliers, including Moody's and S&P, to redistribute their information as part of its service. It also obtains financial statement data from Thomson Reuters.

## Credit Analysis Services

The company publishes and sells the following commercial credit analysis services to corporate credit managers:

An annual fixed-price service (the Fundamental Service) with unlimited usage and coverage of public companies, featuring multi-period spreads of financial reports and ratio analysis, as well as up-to-date financial news screened specifically for usefulness in credit evaluation. Another feature of the service is notification and delivery of this news via email, concerning only companies of interest to the subscriber. This service is supplemented with trade receivable data contributed by the company's subscribers, as well as U.S. public-record filing information (suits, liens, judgments, and bankruptcy information) covering various public and private U.S. companies. The FRISK score is updated daily, based on the latest information available to the company, and is derived from a statistical model back-tested on 10,000 companies over a multi-year period and continually monitored by the company. As of December 31, 2009, the fundamental service covered approximately 40,000 public companies worldwide. Subscribers may opt for limited regional coverage: North American Service for coverage of the U.S., Canadian, Mexican, and Caribbean companies. In addition, it sells its credit limit service on an annual subscription basis. This service monitors daily changes in a customized recommended credit limit for each customer and generates alert messages to subscribers as requested, so they can take immediate action when a customer's circumstances change. This credit limit service is integrated with the fundamental service, which provides analytical depth to subscribers when questions arise or analysis is needed.

Single credit reports on the approximately 40,000 companies covered. These reports are sold mainly via credit card and obtained via the Internet.

Individual credit reports on approximately 20 million foreign public and private companies. These reports are purchased by it through affiliations with third-party suppliers and sold to its subscribers.

## Competition

The company competes with Dun & Bradstreet, Inc.

## History

CreditRiskMonitor.com, Inc. was founded in 1977.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
