term solvency. This sort of company's information will assist and strengthen your company’s decision-making processes.

In the part that describes Crown Andersen Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company’s competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company’s business and sales activities will be boosted by gaining an insight into your competitors’ businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Crown Andersen Inc. business.

About Crown Andersen Inc.

Crown Andersen, Inc., through its subsidiaries, designs, manufactures, sells and installs a range of industrial air pollution control and air handling systems, product recovery equipment, and a complete line of medical, chemical and industrial waste treatment equipment and systems. The Company serves as a holding company for Andersen 2000 Inc. (Andersen) and Griffin Environmental Company, Inc. (Griffin).

Andersen is engaged in the design, manufacture, sale, and installation of specialized industrial pollution control equipment and systems and of medical, chemical and industrial waste treatment equipment and systems, heat exchanger and boiler systems, and industrial fans and blowers. Additionally, Andersen’s wholly owned subsidiary, Montair Andersen bv in Sevenum, The Netherlands (Montair Andersen) manufactures and installs industrial equipment similar to the Andersen equipment for the European, African, Middle Eastern and Far Eastern markets.

Business and Products

Andersen’s pollution control systems include filtration systems, wet scrubbers for particulate and gaseous emission collection, sulfur dioxide removal systems for oil and coal-fired steam boilers and steam generators, odor control systems, gas coolers and

+44 20 8123 2220
info@marketpublishers.com

condensers, mechanical collectors for product recovery, industrial water and waste water treatment systems, spray dryer systems to produce dry powders from waste liquids, which are produced in gas treating systems, heavy duty industrial fans and blowers used primarily in high pressure and alloy steel applications in industrial plants, and heat recovery systems, which allow heat recovery from gas streams which previously could not utilize heat recovery equipment because of their dirty or corrosive nature. These heat recovery systems are used primarily by the chemical industries and food processing industries.

Andersen's chemical and industrial waste treatment systems include thermal oxidation systems (incinerators), waste liquid fired boilers, and chemical treatment systems for which the company furnishes both engineering designs and equipment as well as turnkey installation services. All of Andersen's medical wastes processing systems are based on thermal oxidation.

Montair Andersen designs, manufactures and sells industrial pollution control systems, heat exchangers, incineration systems, and small animal isolators and glove boxes for radioactive and chemically active materials handling. The small animal isolators are used for animals such as chickens and guinea pigs by medical research facilities, pharmaceutical research facilities and animal husbandry facilities.

The radioactive and chemically active materials handling glove boxes are used by nuclear fuels processing facilities, nuclear research facilities, and medical isotope manufacturing operations. These products are sold to both industrial plants and research facilities. Montair Andersen also builds specialized industrial machinery for the electronics, aerospace and chemical process industries and in 1992 began the manufacture of incinerators as well. The Montair Andersen product line includes all of the same incineration systems as Andersen.

Griffin designs, manufactures, and sells a line of fabric filters and cartridge dust collectors, process recovery and pollution control equipment for a variety of industries, including chemicals, food processing, concrete, steel, other metals, clays, paper, glass, and other industries.

History

Crown Andersen, Inc. was founded in 1971.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

+44 20 8123 2220
info@marketpublishers.com

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

+44 20 8123 2220
info@marketpublishers.com

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources
- Financial
- Physical
- Technological
- Organizational

Intangible resources
- Human
- Innovation and Creativity

+44 20 8123 2220
info@marketpublishers.com

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
