Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Culp Inc. business.

About Culp Inc.

Culp, Inc. manufactures, sources, and markets mattress fabrics used for covering mattresses and box springs, and upholstery fabrics primarily for use in production of upholstered furniture (residential and commercial) in North America.

Segments

The company has two operating segments, Mattress Fabrics and Upholstery Fabrics.

Mattress Fabrics Segment

The Mattress Fabrics segment manufactures and markets woven jacquard fabric and knitted fabrics that are used primarily in the production of bedding products, including mattresses, box springs, and mattress sets to bedding manufacturers. Culp Home Fashions has manufacturing facilities located in Stokesdale and High Point, North Carolina, and St. Jerome, Quebec, Canada. The Stokesdale and St. Jerome plants manufacture and finish jacquard (damask) fabric. The Stokesdale plant also finishes knit fabrics, as well as houses the division offices and finished goods distribution capabilities.

Upholstery Fabrics Segment

The Upholstery Fabrics segment markets fabrics for residential and commercial furniture, including jacquard woven fabrics, velvets, microdenier suedes, woven dobbies, knitted fabrics, and piece-dyed woven products. Its fabric products are used in the production of residential and commercial upholstered furniture, sofas, recliners, chairs, loveseats, sectionals, sofa-beds, and office seating. The upholstery fabrics segment operates fabric manufacturing facilities in Anderson, South Carolina, and Shanghai, China. The company markets fabrics produced in these two locations, as well as various upholstery fabrics sourced from third party producers in China.

Products

Mattress Fabrics Segment

Woven jacquards: Includes florals and other intricate designs, which are woven on complex looms using various synthetic and natural yarns.

Specialty: Includes suedes, velours, and other specialty type products are sourced to offer for higher end mattresses.

Knitted Fabric: Includes floral and other intricate designs produced on special-width circular knit machines utilizing various synthetic and natural yarns. Knitted mattress fabrics have inherent stretching properties and spongy softness, which conforms to layered foam packages.

Upholstery Fabrics Segment

Woven jacquards: Includes woven jacquards elaborate, complex designs, such as florals and tapestries in traditional, transitional, and contemporary styles. These are woven on intricate looms using various synthetic and natural yarns.

Woven dobbies: These are the fabrics that use straight lines to produce geometric designs, such as plaids, stripes and solids in traditional, and country styles. These are woven on less complicated looms using various weaving constructions and primarily synthetic yarns.

Velvets: Includes soft fabrics with a plush feel. These fabrics produced with synthetic yarns, either by weaving or by tufting yarn into a base fabric. Basic designs, such as plaids are in both traditional and contemporary styles.

Suede fabrics: Includes fabrics woven or knitted using microdenier polyester yarns, which are piece dyed and finished, usually by sanding. The fabrics are plain or small jacquard designs, with some being printed.

Customers

Mattress Fabrics Segment: The company's major customers for its mattress fabrics include major bedding manufacturers, such as Sealy, Inc., Serta (National Bedding), and Simmons. Its mattress fabrics customers also include small and medium-size bedding manufacturers.

Upholstery Fabrics Segment: The company's major customers for upholstery fabrics are manufacturers of upholstered furniture, including Ashley, Bassett, Berkline/Benchcraft, Best Home Furnishings, Flexsteel, Furniture Brands International (Broyhill and Lane), Klaussner Furniture, La-Z-Boy Incorporated (La-Z-Boy Residential, Bauhaus, and England), and Southern Motion. The company's major customers for its fabrics for commercial furniture include HON Industries.

Competition

Mattress Fabrics Segment: The company's principal mattress fabric competitors include Bekaert Textiles B.V. and Global Textile Alliance.

Upholstery Fabrics Segment: The company's principal upholstery fabric competitors include Richloom Fabrics, Merrimack Fabrics, Morgan Fabrics, and Specialty Textile, Inc. (STI).

History

Culp, Inc. was founded in 1972.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
