The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cypress Bioscience, Inc. business.

About Cypress Bioscience, Inc.

Cypress Bioscience, Inc. provides therapeutics and personalized medicine services, facilitating improved and individualized patient care.

Savella (milnacipran HCl) for the Management of Fibromyalgia

Savella: Savella is a dual-reuptake inhibitor that preferentially blocks the reuptake of norepinephrine with higher potency than serotonin (in vitro), two neurotransmitters thought to play a central role in the symptoms of FM. Milnacipran is approved for the treatment of a non-pain condition in approximately 50 countries. The company would promote Savella for the management of fibromyalgia (FM) with its partner, Forest Laboratories, Inc.

Ongoing Phase IV Trials: The company has ongoing Phase IV clinical studies of Savella.

Personalized Medicine Services

Avise MCV: Avise MCV is a personalized medicine service. Avise MCV is a sensitive and specific test that improves upon traditional means of diagnosing Rheumatoid

Arthritis (RA). Avise MCV measures antibodies to mutated citrullinated vimentin, a protein that is found in the inflamed synovium of patients with RA. Avise PG offers rheumatologists insight into a patient's metabolism of MTX by measuring levels of MTX polyglutamates, the active metabolites of MTX. Avise MCV may be used for first-line diagnostic testing of patients who has symptoms of RA, offering prognostic insight while improving diagnostic accuracy. The company acquired this personalized medicine service as part of its acquisition of Proprius.

Other Personalized Medicine Services

In 2009, the company acquired Cellatope Corporation's technology platform. This technology platform uses cell-bound complement activation products (CB-CAP) to diagnose and monitor debilitating autoimmune disorders, including lupus.

Licenses and Collaborations

The company has a license agreement with Pierre Fabre Medicament. Its license agreement with Pierre Fabre provides it with a license to develop and sell any products with the compound milnacipran as an active ingredient for any indication in the United States and Canada. It also has a supply agreement with Pierre Fabre. Pierre Fabre has the right to manufacture the active ingredients used in the commercial product.

The company has a collaboration agreement with Forest Laboratories for the development and marketing of milnacipran. It selected Forest Laboratories as its development and marketing collaborator based in part on its franchise in central nervous system drugs and in the primary care markets. Under its agreement with Forest Laboratories, sublicensed its rights to develop and commercialize milnacipran to Forest Laboratories for the United States, with an option to extend the territory to include Canada.

History

Cypress Bioscience, Inc. was founded in 1981.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
