Abstracts

Cytec Industries Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Cytec Industries Inc. and its competitors. This provides our Clients with a clear understanding of Cytec Industries Inc. position in the [Chemical](#) Industry.

The report contains detailed information about Cytec Industries Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Cytec Industries Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Cytec Industries Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Cytec Industries Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Cytec Industries Inc. business.

About Cytec Industries Inc.

Cytec Industries Inc. operates as a global specialty chemicals and materials company that engages in developing, manufacturing and selling value-added products. The company's products serve a range of markets, including aerospace, adhesives, automotive and industrial coatings, construction, chemical intermediates, inks, mining, and plastics.

Segments

The company has five business segments: Coating Resins, Additive Technologies, In Process Separation, Engineered Materials, and Building Block Chemicals.

Coating Resins, Additive Technologies, and In Process Separation are managed under Cytec Specialty Chemicals. The Coating Resins segment comprises the Surface Specialties business acquired from UCB, and includes the following product lines: radiation-cured resins (Radcure resins), powder coating resins, and liquid coating resins.

Included in the liquid coating resins product line are waterborne resins, amino cross-linkers, solventborne resins, and urethane resins. Additive Technologies includes

polymer additives, specialty additives, and polyurethanes. As of May 19, 2009, all polyurethanes assets have been divested. In Process Separation includes mining chemicals and phosphines. Engineered Materials principally includes advanced composites, carbon fiber, structural film and pressure sensitive adhesives, and formulated resins. Building Block Chemicals principally includes acrylonitrile, hydrocyanic acid, sulfuric acid, and melamine.

COATING RESINS

RADCURE RESINS: The company produces radiation-cured resins for coatings and graphics applications. These resins are cured (dried and hardened) by exposing them to ultraviolet or electron-beam radiation, rather than heat.

POWDER COATING RESINS: The company's polyester powder resin technologies account for a significant portion of the industrial finishing market. The company offers innovations, such as powder resins for durable clear coats, weather-resistant finishes, and ultraviolet-curing powder coating resins systems for heat-sensitive substrates, such as plastic and wood.

LIQUID COATING RESINS: The company manufactures a range of waterborne and solventborne resins. The company engages in resins for high-solids and waterborne coating systems. Its portfolio includes products based on seven chemistries: acrylics, amino cross-linkers, epoxy systems, alkyds and polyesters, urethanes, phenolics, and unsaturated polyesters. The company also markets a range of additives to assist customers in formulating coatings for protective and decorative applications.

ADDITIVE TECHNOLOGIES

POLYMER ADDITIVES: The company supplies specialty additives which protect plastics from the ultraviolet radiation of sunlight and from oxidation to the plastics industry.

SPECIALTY ADDITIVES: The company supplies sulfosuccinate surfactants, Docusate sodium, acrylamide-based specialty monomers, and PTZ phenothiazine. Sulfosuccinate surfactants and acrylamide-based specialty monomers products are used in emulsion polymers, paints, paper coatings, printing inks, and other customer applications. Docusate is a pharmaceutical grade product used as both an active ingredient and excipient/ formulating aid. PTZ phenothiazine is primarily used as an acrylic acid, acrylic ester, and methacrylate monomer stabilizer.

IN PROCESS SEPARATION

MINING CHEMICALS: The company's mining chemicals product line is primarily used in applications to separate desired minerals from host ores. The company also sells phosphine specialty reagents used in cobalt, nickel solvent extraction separation and complex sulfide flotation applications.

PHOSPHINES: The company's phosphine specialties are utilized for various applications. The company supplies phosphine gas, used in semiconductor manufacturing and light emitting diode applications, and has significant positions in various phosphine derivative products including phosphonium salts used in pharmaceutical catalysts and biocides. Included in the phosphine line are organo phosphorus compounds. The compounds are used primarily as intermediates and catalyst ligands for organic and chemical synthesis in the pharmaceutical and chemical industries.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
