The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of DATATRAK International, Inc. business.

About DATATRAK International, Inc.

DATATRAK International, Inc., a technology and services company, focuses on providing global eClinical solutions for the clinical trials industry. The company, as an application service provider (ASP), provides electronic clinical trials technology referred to as electronic data capture (EDC) to the clinical trials industry. Its customers use its software to collect, review, transmit and store clinical trial data electronically.

DATATRAK Software and Services

The company's system consists of various modules designed for adaptation to the clinical research process. It initially provides a set of electronic data forms that can be modeled to suit the needs of each particular clinical trial.

The company's DATATRAK eClinical software suite provides the following capabilities: EDC, interactive voice response systems (IVRS) (via phone or Internet), medical coding, Web-based randomization, clinical trial management system (CTMS), clinical data management system (CDMS), drug inventory management, digitized electrocardiograms, image collection, viewing and storing capabilities and workgroup collaboration capabilities. The company's legacy-based point solution known as

DATATRAK EDC, is a software product that provides electronic solutions for the global clinical trials industry.

The company's products have been utilized in various aspects of the clinical development of 16 separate drugs and one medical device that have received regulatory approval from either the United States Food and Drug Administration (FDA) or counterpart European regulatory bodies (EMA).

The company's CRO Connect and Enterprise Transfer program allows customers to become empowered to design, set up and manage their clinical trials independently through its ASP delivery.

Customers

The company's customers are companies in the clinical pharmaceutical, biotechnology, contract research organization (CRO), and medical device industries. Its major customers include Otsuka Research Institute, Gilead Sciences, Inc., Allergan, Inc., and Seattle Genetics, Inc. The company markets its software and services through a sales and marketing staff located in the United States and Europe.

Significant Events

The company has a strategic partnership agreement with Inclinix Inc. to offer enrollment services available to pharmaceutical, biotechnology, and medical device companies.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
