Such information creates your awareness about principal trends of Delanco Bancorp Inc. business.

About Delanco Bancorp Inc.

Delanco Bancorp, Inc. operates as the holding company for the Delanco Federal Savings Bank, which provides various financial services to consumers and businesses in New Jersey. The company attracts deposits from the general public and uses those funds to originate various consumer and business loans.

The company's main office is located in Delanco Township, New Jersey and it operates a full-service branch office in Cinnaminson, New Jersey.

Lending Activities

One- to Four-Family Residential Loans: The company offers three types of residential mortgage loans, including fixed-rate loans, balloon loans, and adjustable-rate loans. It offers fixed-rate mortgage loans with terms of 15, 20, or 30 years and balloon mortgage loans with terms of 5, 10, or 15 years.

Construction Loans: The company originates loans to individuals and builders to finance the construction of residential dwellings, and also makes construction loans for small commercial development projects.

Commercial and Multi-Family Real Estate Loans: The company offers fixed- and adjustable-rate mortgage loans secured by various commercial and multi-family real estate, such as small office buildings, warehouses, retail properties, and small apartment buildings. It originates various fixed- and adjustable-rate commercial real estate and multi-family real estate loans for terms approximately 10 years and payments based on an amortization schedule of approximately 25 years.

Commercial Loans: The company offers commercial business loans to professionals, sole proprietorships, and small businesses. It offers installment loans for capital improvements, equipment acquisition, and long-term working capital. These loans are secured by business assets other than real estate, such as business equipment and inventory, or are backed by the personal guarantee of the borrower. The company originates lines of credit to finance the working capital needs of businesses. It also offers accounts receivable lines of credit.

Consumer Loans: The company's consumer loans include home equity loans and lines of credit. It also makes loans secured by passbook or certificate accounts and automobile loans.

Investment Portfolio

As of March 30, 2010, the company's investment portfolio consisted primarily of mortgage-backed securities and debt securities of government sponsored enterprises.

Deposits

The company's deposit products include non-interest-bearing demand deposits (such as checking accounts), interest-bearing demand accounts (such as NOW and money market accounts), savings accounts, and certificates of deposit, as well as commercial checking accounts.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
