Abstracts

Denison Mines Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Denison Mines Corp. and its competitors. This provides our Clients with a clear understanding of Denison Mines Corp. position in the [Energy](#) Industry.

The report contains detailed information about Denison Mines Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Denison Mines Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Denison Mines Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Denison Mines Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Denison Mines Corp. business.

About Denison Mines Corp.

Denison Mines Corp. engages in the exploration, development, mining, and milling of uranium mining projects in both the United States and Canada and development projects in Canada, Zambia and Mongolia.

The company's assets include an interest in 2 of the 4 licensed and operating conventional uranium mills in North America, with its 100% ownership of the White Mesa mill in Utah and its 22.5% ownership of the McClean Lake mill in Saskatchewan.

The company also produces vanadium as a co-product from its mines in Colorado and Utah and recycles uranium-bearing waste materials, referred to as 'alternate feed materials', for the recovery of uranium, alone or in combination with other metals, at its White Mesa mill.

Properties

The United States: The company's principal assets include the White Mesa mill, a 2,000 ton per day uranium and vanadium processing plant near Blanding, Utah; the Arizona Strip uranium properties, in north central Arizona; the Colorado Plateau uranium/vanadium properties, straddling the south western Colorado and Utah border;

the Henry Mountains Complex uranium properties, in south central Utah; and various uranium sales contracts, alternate feed processing contracts and joint venture agreements.

Canada: The company's principal assets include a 22.50% interest in the McClean Lake uranium processing facility and uranium deposits in northern Saskatchewan; a 25.17% interest in the Midwest uranium project, including the Midwest and the Midwest A deposits, Saskatchewan; a 60% interest in the Wheeler River project, Saskatchewan; a 75% interest in the Moore Lake property, Saskatchewan; a 49% interest in the Park Creek property, Saskatchewan; a 22.5% interest in the Wolly project, Saskatchewan; various wholly-owned and joint ventured exploration properties in the Athabasca Basin, Saskatchewan; management services agreement with UPC; and environmental services business (DES).

Mongolia: The company's principal asset is a 70% interest in the Gurvan Saihan Joint Venture, which holds 685,000 hectares of uranium exploration properties in Mongolia.

Zambia: The company's principal assets include a 100% interest in the Mutanga uranium project, which holds a 946 square kilometre prospecting licence in the southern part of Zambia.

Other: The company's other assets include an 8.5% interest in Uranerz Energy Corporation (Uranerz), an exploration company whose securities are listed on the TSX, NYSE Amex and Frankfurt stock exchanges. Uranerz has uranium properties in Saskatchewan and Wyoming.

Operations

McClean Lake Mining and Processing Facilities

McClean Lake is a uranium mining and processing facility located on the eastern edge of the Athabasca Basin in northern Saskatchewan approximately 26 kilometers west of the Rabbit Lake mine and approximately 750 kilometers north of Saskatoon. The McClean Lake surface facilities consist of a modern mill licensed to produce 8.0 million pounds of uranium per year. The facilities have been expanded to a capacity of 12 million pounds per year to permit the processing of ore from Cigar Lake.

White Mesa Mill

The White Mesa mill, a licensed uranium mill with a vanadium co-product recovery circuit, is located in south eastern Utah near the Colorado Plateau District, the Henry Mountains Complex and the Arizona Strip. The mill is approximately six miles south of the city of Blanding, Utah. The mill is licensed to process an average of 2,000 tons per day of ore and produce up to 8.0 million pounds of U₃O₈ per year.

Alternate Feed Materials

The company's license gives it the right to process other uranium-bearing materials known as 'alternate feed materials'. Alternate feed materials are uranium-bearing materials, which usually are classified as waste products by the generators of the materials.

U.S. Mines

Colorado Plateau District: The Colorado Plateau district is an area encompassing approximately 20,000 square miles and straddles the border of south eastern Utah and south western Colorado. The company's principal mining complexes in the Colorado Plateau District consist of the La Sal, Van 4, Sunday, and East Canyon (Rim) zones. The bulk of the mineral deposits in the Colorado Plateau District are contained in three areas: the Sunday Mine complex, which includes the Sunday/St. Jude, West Sunday, Topaz and Carnation mines; the La Sal complex, which includes the La Sal, Beaver and Pandora mines; and the East Canyon Area, which includes the Rim mine.

Henry Mountains Complex: The Henry Mountains Complex is one contiguous property located in eastern Garfield County, Utah, 15 to 20 miles north of Bullfrog Basin Marina on Lake Powell and approximately 40 air miles south of the village of Hanksville, Utah. The Henry Mountains Complex includes Bullfrog on the north end of the property, hosting the Indian Bench, Copper Bench and Southwest uranium deposits, and Tony M located on the south end of the property, hosting the Tony M deposit and mine.

Arizona Strip: The Arizona Strip is an area bounded on the north by the Arizona/Utah state line; on the east by the Colorado River and Marble Canyon; on the West by the Grand Wash cliffs; and on the south by a midpoint between the city of Flagstaff and the Grand Canyon. The area encompasses approximately 13,000 square miles

History

Denison Mines Corp. was founded in 1996.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
