The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of DGSE Companies Inc. business.

About DGSE Companies Inc.

DGSE Companies, Inc. buys and sells jewelry, bullion products, and rare coins to individual consumer, dealers, and institutions throughout the United States.

Products and Services

The company's jewelry operations include sales to wholesale and retail customers. It sells finished jewelry, gem stones, and findings (gold jewelry components) and makes custom jewelry to order. In addition, the company purchases inventory from pawn shops and individuals. It offers jewelry repair services to its customers through its facilities in Dallas and Euless, Texas; Mt. Pleasant, South Carolina; and Woodland Hills, California.

The company's bullion and rare coin trading operations buy and sell various forms of precious metals products, including the United States and other government coins, medallions, art bars, and trade unit bars. Bullion and rare coin transactions are conducted at its store locations.

The company operates 8 primary internet sites and approximately 900 related landing sites on the World Wide Web. Its primary presence on the Internet is through its Web

sites DGSE.com, CGDEinc.com, SGBH.com, Superiorpreciousmetals.com, Superiorestatebuyers.com, USBullionexchange.com, Americangoldandsilverexchange.com, and Fairchildwatches.com.

The DGSE.com Web site serves as a corporate information site, a retail store where the company sells its products and an auction site for jewelry and other products. The Internet store functions as a CyberCash authorized site, which allows customers to purchase products automatically and on line.

The SGBH.com Web site services as a primary rare coin marketing site and includes a retail store and conducts regular online auctions.

Americangoldandsilverexchange.com provides customers from the United States with a method to sell unwanted valuables by sending them directly to its corporate facilities for evaluation.

The company's Internet activity also includes a Web site, USBullionExchange.com, which allows customers access to quotations for prices on approximately 200 precious metals, coins, and other bullion related products.

The company also offers wholesale customers a virtual catalog of its fine watch inventory through its Web site, Fairchildwatches.com.

Sales and Marketing

The company markets its bullion and rare coin trading services through a combination of advertising in national coin publications, local print media, coin and bullion wire services, and its Internet Web site.

Dispositions

In 2009, the company sold the assets of National Jewelry Exchange, Inc. (its two pawn shops) to an unrelated third party.

In December 2009, the company discontinued the operations of Superior Estate Buyers.

History

DGSE Companies, Inc. was founded in 1965.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
