Such information creates your awareness about principal trends of Dibz International, Inc. business.

About Dibz International, Inc.

Dibz International, Inc., a technology company, provides Internet based personal content management system, an all-in-one communications platform to users of viral social networks. Its platform allows the users to distribute, capture, catalog, and review personal content utilized on the viral social network sites.

Products

The company allows the storage, capturing, cataloging, manipulation and review of personal content published on or to the web. The content can then be sorted, stored, distributed via wireless and viewed. The individual components are: Voice Comments, Text Messaging, Multimedia Messaging, Email services, Calendar Functions, Content Management, Friend Management, and Partner Programs.

Voice Comments: Users can record, post, play and store voice comments. The comments may be made public or kept private, depending upon the user's personal preferences.

Text Messaging: Users receive and reply to text messages generated by other users. These messages would be stored for future retrieval by the user and may be posted to

social networks on the users behalf if so requested.

Multimedia Messaging: Users receive and reply to multimedia messages, including picture and video options. The multimedia messages are stored for future retrieval by the user and may be posted to social networks on the users behalf if so requested.

Email services: Users would have the ability to generate and reply to email messages. The email messages are stored for future retrieval by the user and may be posted to social networks on the users behalf if so requested.

Calendar Functions: Users would have the ability to automatically schedule events such as reminders and notices. These events would automatically be sent via text messaging, multimedia messages, emails or a combination of all based on the users settings for each individual recipient of the message.

Content Management: All communication sent or received through the Dibz platform is stored and organized for retrieval by the user.

Friend Management: The user creates an on-line friends contact book that the user may group and sort. The user then uses these groups, lists and friends to communicate with their friends.

Partner Programs: These are programs designed by the company to allow other websites to partner and participate in the company's business model.

History

Dibz International, Inc. was founded in 2006.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
