term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes DIC Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of DIC Corporation business.

About DIC Corporation

DIC Corporation engages in the manufacture and sale of printing inks, organic pigments, and synthetic resins in Japan and internationally. The company's Graphic Arts segment offers offset inks, gravure inks, flexo inks, can coatings, news inks, and packaging adhesives; presensitized plates, printing supplies, and printing-related equipment; and organic pigments for printing inks and coating and plastics. Its Industrial Materials segment provides synthetic resins for inks and coatings; molded products; polyurethane, epoxy, unsaturated polyester, acrylic, phenolic, and alkyd resins; papermaking chemicals; and plasticizers, alkyl phenols, metal carboxylates, and sulfurized chemicals. It serves coatings, building materials, automobiles, electrical and electronics equipment, and textile manufacturers. The company's High Performance and Applied Products segment provides plastic colorants, optical materials, and compounds; decorative boards and interior housing products; polystyrene and coextruded multilayer films; industrial adhesive tapes labels, stickers, and label stock; and plastic pallets and containers. It serves housing construction, civil engineering, food packaging, and automobile manufacturing companies. Its Electronics and Information Materials segment offers UV-curable coatings and bonding adhesives, specialty magnetic foils, toners, and jet inks; liquid crystal materials; engineering plastics; and hollow-fiber membranes and modules. It serves electrical and electronics equipment and information technology sectors. The company also engages in the purchase, sale,

lease, brokerage, proprietorship, and management of real estate; and the provision of logistics, security and personnel agency, IT consulting, and engineering and construction services. The company was formerly known as Dainippon Ink and Chemicals, Incorporated and changed its name to DIC Corporation in April 2008. DIC Corporation was founded in 1908 and is headquartered in Tokyo, Japan.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
