Such information creates your awareness about principal trends of Diebold, Incorporated business.

About Diebold, Incorporated

Diebold, Incorporated provides integrated self-service delivery and security systems and services primarily to the financial, commercial, government, and retail markets worldwide.

Segments

The company's operates in three segments, including Diebold North America (DNA), Diebold International (DI), and Election Systems (ES) & Other.

The DNA segment sells and services financial and retail systems in the United States and Canada.

The DI segment sells and services financial and retail systems over the remainder of the globe through wholly-owned subsidiaries, majority-owned joint ventures and independent distributors in every major country throughout Europe, the Middle East, Africa, Latin America and in the Asia Pacific region (excluding Japan and Korea).

The ES & Other segment includes the operating results of the voting and lottery related business in Brazil.

Product and Service Solutions

The company has two core lines of business, including Self-Service Solutions and Security Solutions, which it can integrate based on the customers' needs.

Self-Service Solutions

The company offers an integrated line of self-service technologies and services, including ATM outsourcing, ATM security and fraud, deposit and payment terminal and software. It supplies ATMs and related services.

Self-Service Hardware: The company offers various self-service solutions. Self-service products include a range of ATMs and teller automation, including deposit automation technology, such as, check-cashing machines, bulk cash recyclers and bulk check deposit.

Self-Service Software: The company offers software solutions consisting of multiple applications that process events and transactions.

Self-Service Support and Managed Services: From analysis and consulting to monitoring and repair, the company provides value and support to its customers every step of the way. Services include installation and ongoing maintenance of the company's products, OpteView remote services, branch transformation and distribution channel consulting. Outsourced and managed services include remote monitoring, troubleshooting for self-service customers, transaction processing, currency management, maintenance services and full support via person to person or online communication.

Security Solutions

The company manufactures a range of security offerings it provides. It provides physical and electronic security systems, as well as facility transaction products that integrate security, software and assisted-service transactions, providing total security systems solutions to financial, retail, commercial and government markets.

Physical Security and Facility Products: The company provides security solutions and facility products, including in-store bank branches, pneumatic tube systems for drive-up lanes, vaults, safes, depositories, bullet-resistive items, and undercounter equipment.

Electronic Security Products: The company provides a range of security products, including digital surveillance, card systems, biometric technologies, alarms and remote monitoring and diagnostics.

Monitoring and Services: The company provides security monitoring solutions, including fire, managed access control, energy management, remote video management and storage, as well as logical security.

Integrated Solutions

The company provides outsourcing solutions with a single point of contact. Each solution may include hardware, software, services or a combination of all three components. It provides value to its customers by offering a range of integrated services and support. The company also provides design, sales, service, installation, project management and monitoring electronic security products to financial, government, retail and commercial customers.

Election Systems

The company, through its wholly owned subsidiary Procomp Industria Eletronica LTDA (in Brazil), provides voting equipment and related products and services. It provides elections equipment, networking, tabulation and diagnostic software development, training, support and maintenance.

Competition

In the area of automated transaction systems, the company competes on a global basis primarily with NCR Corporation and Wincor-Nixdorf. On a regional basis, the company competes with other hardware and software companies, such as Grg Equipment Co. in Asia Pacific and Itaotec in Latin America.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
