Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Digimarc Corporation business.

About Digimarc Corporation

Digimarc Corporation enables governments and enterprises to give digital identities to media and objects that computers can sense and recognize and to which they can react. The company's technology provides the means to infuse digital information, perceptible only to computers and digital devices, into all forms of media content. The company's technology permits computers and digital devices to identify relevant data from vast amounts of media content.

Products and Services

The company provides media identification and management solutions to commercial entities and government customers and licenses technology to other solution providers. It licenses technology primarily to commercial entities who use the company's technology and patented inventions to address opportunities in the media and entertainment industry. The company's major government customer is the Central Banks, with whom it has been developing, deploying, supporting, and continuing to enhance a system to deter digital counterfeiting of currency using personal computers and digital reprographics for several years.

Commercial customers use a range of solutions from business partners and the

company to identify, track, manage, and protect content as it is distributed and consumed—either digitally or physically—and to enable new consumer applications to access networks and information from personal computers and mobile devices. Movie studios, record labels, broadcasters, creative professionals and other customers rely on digital watermarking as a means to: deter piracy and illegal use of movies, music and images; protect entertainment content from copyright infringement; track and monitor entertainment content for rights usage and licensing compliance; monitor advertisements to verify ad placement and measure return on investment; enhance information access, search and marketing capabilities related to media content; and enable fair and legitimate use of content by consumers.

Licensees of the company's technology or intellectual property include AquaMobile, Microsoft Corporation, The Nielsen Company, Civolution, Signum Technologies, Verance Corporation and Verimatrix, Inc.

Markets

The company's technology is used in various media identification and management products and solutions supporting a variety of media objects, from movies and music, to banknotes and secure credentials. Each media object enabled by its technology creates the potential for several applications, such as: counterfeiting and piracy deterrence; content identification and media management; authentication and monitoring; linking to networks and providing access to information; and enhanced services in support of mobile commerce.

Joint Venture and Patent License Agreements with The Nielsen Company

The company, in June 2009, entered into two joint venture agreements with The Nielsen Company (Nielsen) to launch two new companies. Under the new agreements, the company and Nielsen plan to work together to develop new products and services, including the expansion and deployment of those products and services that were in development.

TVaura LLC is a jointly owned company that focuses on the discovery, development, and commercialization of copyright filtering solutions, royalty/audit systems or products for online video and audio rights organizations, guilds or other organizations involved in reconciliation of royalties, residuals and other payments, and other related products. TVaura Mobile LLC is a jointly owned company that the company established with Nielsen to focus on the discovery, development, and commercialization of certain

enhanced television offerings, and other related products.

Customers and Business Partners

The company has significant long-term contracts with the Central Banks, Nielsen, and the joint venture, TVaura LLC for the commercial and government applications of its technology.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
