## Abstracts

Digital Video Systems, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Digital Video Systems, Inc. and its competitors. This provides our Clients with a clear understanding of Digital Video Systems, Inc. position in the Industry.

The report contains detailed information about Digital Video Systems, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Digital Video Systems, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Digital Video Systems, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Digital Video Systems, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Digital Video Systems, Inc. business.

### **About Digital Video Systems, Inc.**

Digital Video Systems, Inc. provides a range of digital video technologies. The company manufactures and supplies a range of DVD components, sub-systems, and finished products for home, automotive, and other segments of the worldwide consumer electronics markets. It has operations in the United States, China, and India, with manufacturing in India.

#### **Products and Technologies**

The company's products include finished products for the automotive entertainment market, as well as a range of DVD loaders and mechanisms for DVD and DVD Rewritable products.

#### **Car DVD Loaders**

The company offers DSV-800 series of portable DVD slot loaders, which consists of three models, the DSV-810, DSV-811, and DSV-813. These products are targeted at the automotive, home, and portable DVD player markets.

The new DSV-800 series car DVD loaders are used in the new series of portable and

automotive player products. The DSV-800 loader series are suited for OEM suppliers of car DVD players, and other applications.

### New Car DVD Players

The company's player products include portable as well as in-dash DVD players and DVD receivers.

The VXM-3000 is a portable DVD player that is designed for use in the home or in vehicles. The VXM-3000 can be locked into a roof mounted docking station that provides power and connections to the vehicle's sound system. The system has a 10.2 inches wide format LCD screen and also supports MP3 and WMA playback.

The VXM-2000 series of portable car DVD players and the new VXD-2000 series of car AM/FM/RDS/DVD Receivers combine the features of a car DVD player and a AM/FM radio. The VXD 2000 in-dash Car DVD/CD/MP3/AM/FM receiver combines the features of a car DVD player and AM/FM radio.

VXM 2000 Series is for installation in a vehicle or freestanding use in the home. The multi-use DVD model VXM-2200 can be installed in either vertical or horizontal mountings in a car interior or at home.

### DVD+R/RW Loader

The company's new DRL-100 Recordable ATAPI DVD+RW loader incorporates proprietary DVS technology and is designed to offer recording of digital media. This DVD+RW loader would be used as the key system component by a range of recorder/player suppliers. It also offers DRL 100 DVD+RW (rewritable) loader product, the primary component for DVD+RW recorder/players.

### History

Digital Video Systems, Inc. was founded in 1992.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
