This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes digitiliti, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of digitiliti, Inc. business.

About digitiliti, Inc.

Digitiliti, Inc. provides data protection solutions to the small to medium businesses and markets in the United States. This data protection solution is geared specifically to help organizations properly manage and protect their network from one centralized location, with offsite redundancy. Its solutions can backup and restore data on every machine in a network, including desktops, laptops, file, and print servers.

The company combines an agent-less backup software with its remote Pharaoh business fortress storage center to deliver to its customers an online-offsite data backup and restore solution. It provides storage from a 'utility based computing' philosophy, whereby customers pay for the gigabytes of data they store in its data storage center. It has two storage vaults in its data storage center, including 1-105 Terabyte system and 1-95 Terabyte system.

Storage Technologies: In DigiBAK, the company uses a third party application called Asigra, Inc., which manages and controls the data being archived and retrieved from the customer to its data storage center. Asigra provides the capability to move and manage large blocks of data and to ensure the integrity and security of the information stored. Asigra also provides the capability to track and report on storage volumes by customers, providing the basis for its monthly billing.

Information Technologies: It moves and manages information objects, which, in effect, are human recognized content, such as a Word document or an Excel spreadsheet. Technologies employed in DigiLIBE include de-duplication to remove duplicate types of information from the system. Customers can use digitiliti's data storage vault services, their own or a third party for active archiving. DigiBAK is an on-line data backup and recovery service.

Customers

The company serves customers throughout the United States in a group of data intensive industries, including financial services, engineering and scientific, construction, health care, education, and legal services.

Suppliers

For DigiBAK, the company's principal supplier partners are Asigra, Inc., a software vendor providing system management tools, Exanet providing hardware and software and its data transmission supplier. Its hardware information director is sourced to Rorke Data, Inc, a division of Bell Micro.

Competition

The company's competitors include Iron Mountain, EVault, EMC, IBM, NetApp, Symantec, and HP.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
