term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Dish Network Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Dish Network Corp. business.

About Dish Network Corp.

DISH Network Corporation provides pay-TV services in the United States. The company has approximately 14.100 million customers across the United States, as of December 31, 2009.

Products and Services

Programming: The company provides programming which includes approximately 280 basic video channels, 60 Sirius Satellite Radio music channels, 30 premium movie channels, 35 regional and specialty sports channels, 2,500 local channels, 220 Latino and international channels, and 50 channels of pay-per-view content. It distributes approximately 2,500 local channels, a subscriber typically may only receive the local channels available in the subscriber's home market. As of December 31, 2009, the company provided local channel coverage in standard definition to markets covering approximately 97% of U.S. TV households. In addition, it provided HD local channels to markets representing approximately 93% of U.S. TV households.

Receiver Systems: The company's subscribers receive programming via in-home equipment that includes a small satellite dish, digital set-top receivers, and remote controls. Its new receiver models are Internet-protocol compatible which allows

consumers to view movies and other content on their televisions via the Internet and a broadband connection.

Content Delivery

Digital Broadcast Operations Centers: The principal digital broadcast operations centers that the company uses are EchoStar's facilities located in Cheyenne, Wyoming and Gilbert, Arizona. It also uses eight regional digital broadcast operations centers owned and operated by EchoStar that allow to maximize the use of the spot beam capabilities of certain owned and leased satellites.

Satellites: DISH Network programming is delivered to customers using satellites that operate in the 'Ku' band portion of the microwave radio spectrum. The Ku-band is divided into two spectrum segments. The portion of the Ku-band that allows the use of higher power satellites — 12.2 to 12.7 GHz over the United States — is known as the Broadcast Satellite Service (BSS) band, which is also referred to as the Direct Broadcast Satellite (DBS) band. The company owns or leases capacity on 11 satellites in geostationary orbit approximately 22,300 miles above the equator.

Conditional Access System: The company's conditional access system secures programming content using encryption so that only paying customers can access its programming. The company uses microchips embedded in credit card-sized access cards, called 'smart cards,' or security chips in receiver systems to control access to authorized programming content (Security Access Devices).

Strategic Alliances

In April 2010, Google Inc. and Dish Network Corp. have teamed up to develop a television programming search service. The service, which the two companies are in testing, runs on TV set-top boxes that incorporate Google's Android wireless technology.

Competition

The company's competitors are DirecTV Group, Inc., AT&T, and Verizon.

History

DISH Network Corporation was founded in 1980.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
