term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes DNI Metals Inc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of DNI Metals Inc business.

## **About DNI Metals Inc**

Dumont Nickel Inc., a development stage company, engages in the acquisition, exploration, and development of natural resource properties in the United States and Canada.

### Properties

The company's mineral assets comprise three properties as follows: 29 Metallic and Industrial Mineral Permits, Athabasca region, northeast Alberta; a 36 square kilometer land position in the Attawapiskat region, located in the James Bay Lowlands, Ontario, Canada; and 29 lode claims and one mineral lease staked in the Marysville Uranium District, in Beaver County, Utah.

#### SBH Property, Alberta

The company holds a 100% undivided direct interest in 29 metallic and industrial mineral permits, located approximately 120 kilometers north of Fort McMurray, Alberta. The property comprises an aggregate of 2,536 square kilometers.

#### Attawapiskat Property, Ontario

The Attawapiskat property is located in the James Bay Area, Ontario. The company optioned the property to Kel-Ex Development Ltd. (Kel-Ex), which has the option to earn up to a 90% interest in the property. The Attawapiskat property is under exploration by Kel-Ex and its partners. The Property comprises approximately 36 square kilometers.

#### Marysvale Property, Utah

The company holds 100% interest in the Marysvale Property. The Property is located in the Marysvale Uranium District in central Utah, approximately 300 kilometers south of Salt Lake City. The Marysvale Property consists of 29 lode claims and one mineral lease.

#### Red Lake, Ontario

The company holds a 50% interest in certain claims located approximately 5 km to the east of the Louvicourt Mine in Val-d'Or, Quebec and certain patented claims in the Red Lake Gold District, Ontario.

#### Disposition

In July 2009, the company disposed its interests in Clifton-GoldHill Mining District Projects, Utah.

#### History

Dumont Nickel Inc. was incorporated in 1954. The company was formerly known as Dumont Nickel Corporation and changed its name to Dumont Resources Inc. in 1997. Further, the company changed its name to Dumont Nickel Inc. in 1998.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
