The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Dominion Resources, Inc. business.

About Dominion Resources, Inc.

Dominion Resources, Inc. engages in the production and transportation of energy. It provides electricity, natural gas, and related services to customers primarily in the eastern region of the United States.

The company's portfolio of assets includes approximately 27,500 megawatts of generation, 6,000 miles of electric transmission lines, 56,000 miles of electric distribution lines in Virginia and North Carolina, 12,000 miles of natural gas transmission, gathering and storage pipeline, 21,700 miles of gas distribution pipeline, exclusive of service lines of two inches in diameter or less, and 1.3 Tcfe of proved natural gas and oil reserves. The company also owns underground natural gas storage system, operates approximately 942 bcf of storage capacity and serves retail energy customers in 12 states.

The company's nonregulated operations include merchant generation, energy marketing and price risk management activities, retail energy marketing operations, and natural gas and oil exploration and production in the Appalachian basin of the U.S. Its operations are conducted through various subsidiaries, including Virginia Power.

Virginia Power is a regulated public utility that generates, transmits, and distributes

electricity for sale in Virginia and northeastern North Carolina. In Virginia, Virginia Power conducts business under the name 'Dominion Virginia Power.' In North Carolina, it conducts business under the name 'Dominion North Carolina Power' and serves retail customers located in the northeastern region of the state, excluding certain municipalities. In addition, Virginia Power sells electricity at wholesale prices to rural electric cooperatives, municipalities' and into wholesale electricity markets.

Segments

The company manages its daily operations through three primary operating segments: Dominion Virginia Power (DVP), Dominion Energy, and Dominion Generation.

DVP includes its regulated electric transmission, distribution and customer service operations, as well as its nonregulated retail energy marketing operations. The company's electric transmission and distribution operations serve residential, commercial, industrial, and governmental customers in Virginia and northeastern North Carolina.

Properties: DVP has approximately 6,000 miles of electric transmission lines of 69 kilovolt (kV) or more located in the states of North Carolina, Virginia and West Virginia. Portions of DVP's electric transmission lines cross national parks and forests under permits entitling the federal government to use.

While Virginia Power owns and maintains its electric transmission facilities, they are a part of PJM, which coordinates the planning, operation, emergency assistance, and exchange of capacity and energy for such facilities. In addition, Virginia Power's electric distribution network includes approximately 56,000 miles of distribution lines, exclusive of service level lines, in Virginia and North Carolina.

Dominion Generation

The Dominion Generation Operating Segment includes the generation operations of the Virginia Power regulated electric utility and its related energy supply operations. Virginia Power's utility generation operations primarily serve the supply requirements for the DVP segment's utility customers. The generation mix is diversified and includes coal, nuclear, gas, oil and renewables. The generation facilities of Virginia Power's electric utility fleet are located in Virginia, West Virginia and North Carolina.

The Dominion Generation Operating Segment of Dominion includes Virginia Power's

generation facilities and its related energy supply operations, as well as the generation operations of Dominion's merchant fleet and energy marketing and price risk management activities for these assets. The generation facilities of Dominion's merchant fleet are located in Connecticut, Illinois, Indiana, Massachusetts, Pennsylvania, Rhode Island, West Virginia, and Wisconsin.

Dominion Energy

Dominion Energy includes Dominion's Ohio and West Virginia regulated natural gas distribution companies, regulated gas transmission pipeline and storage operations, natural gas gathering, and by-p

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
