term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Domtar Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Domtar Corporation business.

About Domtar Corporation

Domtar Corporation manufactures and markets uncoated freesheet paper in North America. The company also manufactures papergrade, fluff, and specialty pulp. The company designs, manufactures, markets, and distributes a range of paper products for various customers, including merchants, retail outlets, stationers, printers, publishers, converters, and end-users. It also produces lumber and other specialty and industrial wood products.

Segments

The company has three business segments: Papers, Paper Merchants, and Wood.

PAPERS

The Papers segment engages in the manufacture and distribution of business, commercial printing and publishing, and converting and specialty papers, as well as market pulp.

The company has 10 pulp and paper mills in operation (eight in the United States and two in Canada) with an annual paper production capacity of approximately 3.9 million

tons of uncoated freesheet paper. In addition, the company has an annual production capacity of 238,000 tons of coated groundwood at its Columbus paper mill. The company has the capacity to sell approximately 1.9 million metric tonnes of pulp per year. It produces market pulp at its three non-integrated pulp mills in Kamloops, Woodland and Dryden, as well as at its pulp and paper mills in Espanola, Ashdown, Hawesville, and Windsor. The company also produces pulp at its Plymouth mill.

The company owns power generating assets, including steam turbines, at 13 locations: Ashdown, Dryden, Espanola, Hawesville, Johnsonburg, Kamloops, Kingsport, Nekoosa, Plymouth, Port Huron, Rothschild, Windsor, and Woodland, as well as hydro assets at 5 locations: Espanola, Gatineau, Nekoosa, Woodland, and Rothschild.

Product Offering

The company's uncoated freesheet papers and coated groundwood papers are used for business, commercial printing and publishing, and converting and specialty applications. Business papers include copy and electronic imaging papers, which are used with ink jet and laser printers, photocopiers, and plain-paper fax machines, as well as computer papers, preprinted forms and digital papers. These products are primarily for office and home use.

The company's commercial printing and publishing papers include uncoated freesheet papers, such as offset papers and opaques and coated groundwood. These uncoated freesheet grades are used in sheet and roll fed offset presses across the spectrum of commercial printing end-uses, including digital printing. The company's publishing papers include tradebook and lightweight uncoated papers used primarily in book publishing applications, such as textbooks, dictionaries, catalogs, magazines, hard cover novels and financial documents. Design papers, a sub-group of commercial printing and publishing papers, have distinct features of color, brightness, and texture and are targeted towards graphic artists, design and advertising agencies, primarily for special brochures and annual reports. Coated groundwood papers are used primarily in magazines, catalogs and inserts.

The company also produces paper for various converting and specialty markets. These converting and specialty papers consist primarily of base papers that are converted into finished products, such as envelopes, tablets, business forms and data processing/computer forms and base stock used by the flexible packaging industry in the production of food and medical packaging and other specialty papers for various other industrial applications, including base stock for sandpaper, base stock for medical

gowns, drapes and packaging, as well as transfer paper for printing processes. The company also participates in various converting grades for specialty and security applications.

The company sells business papers primarily to paper merchants, office equipment manufacturers, stationers, and retail outlets. It distributes uncoated commercial printing and publishing papers to end-users and commercial printers, mainly through paper merchants, as well as selling directly to converters. The company sells its converting and specialty products mainly to converters, who apply a further production process, such as coating, laminating, folding or waxing to

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Domtar Corporation Fundamental Company Report Including Financial, SWOT, Competitors and Industry Analysis

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources Financial

Physical

Technological

Organizational

Intangible resources Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
