The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Dynacq Healthcare Inc. business.

About Dynacq Healthcare Inc.

Dynacq Healthcare, Inc., through its subsidiaries, provides healthcare management services to a hospital in China. The company invests in debt and equity securities, including short-term investments in initial public offerings and pre-initial public offerings. It also invests in artifacts for resale.

Divisions

The company operates two divisions that include the China and Corporate.

China Division

The company, through its wholly owned subsidiary, Dynacq Huai Bei Healthcare, Inc. (Dynacq-Huai Bei), provides healthcare management services to the Second People's Hospital in Rui An, China.

In 2009, the company incorporated a wholly owned subsidiary, Hu GangJing (Hang Zhou) Technology Company Limited (Hang Zhou Tech), a holding company for investments in the city of Hang Zhou and other cities in China. Hang Zhou Tech would invest in businesses or form joint ventures with other companies to engage in

businesses, such as energy, life sciences, and pharmaceuticals.

In 2009, Hang Zhou Tech incorporated two wholly owned subsidiaries, namely Hang Zhou Hu GangJing Investment Management Company Limited (Hang Zhou Investment Management) and Hang Zhou Hu GangJing Medical Investment Company Limited (Hang Zhou Medical Investment). Hang Zhou Tech, through its subsidiary, Hang Zhou Investment Management, intends to invest in technologies, such as energy; and through its subsidiary, Hang Zhou Medical Investment, intends to invest in healthcare, including pharmaceuticals.

In March 2010, Dynacq-Huai Bei incorporated a subsidiary, Shanghai Hu Jing Investment Management Company Limited (Shanghai Hu Jing), in which Dynacq-Huai Bei owns 90%, and Hang Zhou Tech owns 10%. Shanghai Hu Jing intends to invest in sandstone mining, mined coal trading, and natural gas stations. In September 2010, Shanghai Hu Jing incorporated a wholly owned subsidiary, Shanghai Run Tien Enterprise, Ltd. (Shanghai Run Tien), to invest in artifacts to be sold and commercial real estate rentals.

The company has also organized Sino Bond Inc. Limited (Sino Bond) to hold and manage investments in Hong Kong. Sino Bond has entered into a marketing contract related to healthcare services by Dynacq subsidiaries in China and southeast Asia and invests in debt and equity securities in Europe and Asia, including initial public offerings and pre-initial public offerings.

Dispositions

In August 2010, the company disposed the Pasadena facility (operated by Vista Community Medical Center, L.L.C.) and Garland facility (operated by Vista Hospital of Dallas, LLP).

History

The company was founded in 1983. It was formerly known as Dynacq International, Inc. and changed its name to Dynacq Healthcare, Inc. in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
