Abstracts

e-Future Information Technology Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between e-Future Information Technology Inc. and its competitors. This provides our Clients with a clear understanding of e-Future Information Technology Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about e-Future Information Technology Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for e-Future Information Technology Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The e-Future Information Technology Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented

on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes e-Future Information Technology Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of e-Future Information Technology Inc. business.

About e-Future Information Technology Inc.

eFuture Information Technology, Inc. provides software and services to retail and consumer goods industries in China.

Business

The company's businesses include its front-end supply chain total solution business and its eService business.

The company's front-end supply chain total solution business is its core business, and includes its software solutions and related value-added services. This business provides front-end supply chain total solutions in the retail and consumer goods industries.

The company's software solutions, which optimize business processes, can be divided into three segments, which include its foundation solutions, collaborative solutions and intelligent solutions. Its software solutions are enhanced and supported by its software related value-added services, which include recurring support services on existing

software installations, delivery services, consulting services and outsourcing services.

eService business includes business-to-business (B2B) services, Software-as-a-Service (SaaS), which includes supply chain management (SCM) solutions and business-to-consumer (B2C) store solutions, and transaction plus one day supply chain financing (T+1 SCF) services.

SOFTWARE BUSINESS

Software Solutions

The company's software solutions consist of three independently deployable groups of products, including foundation solutions, collaborative solutions and intelligent solutions, which range from internal and external collaborative process management to business analysis.

The company's foundation solutions are used to meet client needs for services, such as retail management, point of sale (POS), distribution management, logistics management, warehouse management, vendor payment and control and loyalty card management. Its collaborative solutions are used to meet client needs for services, such as visual SCM and visual process management systems.

The company's intelligent solutions are used to meet client needs for services such as business intelligence, brand analysis, supplier relationship management and customer relationship management systems.

Related Value-Added Services

The company's software related value-added services business includes recurring support services on existing software installations, delivery services, consulting services and outsourcing services. Support Services are provided following the installation of its software solutions, as clients would typically require ongoing maintenance support and software upgrades to ensure the operation of their system. These services are designed to assist its customers with integration issues and to answer questions that may arise.

Delivery Services are provided to customers to assist in planning and executing their projects throughout the process. The company provides various services at different stages in the management of a project.

Consulting Services are provided by the company's consulting services group, which consists of business consultants, systems analysts and technical personnel with retail, manufacturing, and wholesale industry experience. The consulting services group assists its customers in all phases of systems implementation that exceed the limited services it provides under its maintenance arrangements, including systems planning and design, customer-specific configuration of application modules, and on-site implementation or conversion from existing systems. The company also offers various post-implementation consulting services.

Outsourcing Services: eFuture outsourcing services can manage all or parts of the company's clients' non-core business processes or technology operations, from selective outsourcing to full-scope system and network outsourcing and data center management. eFuture teams manage and operate client internal business processes. The company provides design, development, implementation, operation, and improvement of both IT and business functions.

ESERVICE BUSINESS

The company's eServices business based on cloud computing architecture, includes B2B services, SaaS services, which includes SCM solutions and B2C store solutions, and T+1 SCF services.

B2B service

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
