## Abstracts

Eacom Timber Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Eacom Timber Corporation and its competitors. This provides our Clients with a clear understanding of Eacom Timber Corporation position in the [Wholesale and Distribution Industry](#).

The report contains detailed information about Eacom Timber Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Eacom Timber Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Eacom Timber Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Eacom Timber Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Eacom Timber Corporation business.

## **About Eacom Timber Corporation**

Inflazyme Pharmaceuticals, Ltd., a biopharmaceutical company, engages in the sale and licensing of research equipment.

Inflazyme Technology

LSAIDs

The company's core technology is based on a series of leukocyte selective anti-inflammatory drugs (LSAIDs). In pre-clinical studies, the company's LSAIDs have been shown to suppress the migration of leukocytes (white blood cells) from the general circulatory system to sites of inflammation in response to various stimuli. LSAIDs have also been shown to reduce the coordinated hyper-responsive constriction in airways. The company has developed several separate and chemically distinct series of LSAIDs. It has advanced three distinct LSAIDs from the IPL5 series into clinical development: IPL512,602, IPL550,260 and IPL576,092.

PDE4 Inhibitors

The company's second technology consists of orally active inhibitors of Phosphodiesterases (PDEs). PDEs are a family of enzymes that metabolize the intracellular messengers cyclic AMP (cAMP) and cyclic GMP. Cyclic-AMP phosphodiesterase 4 (PDE4) is an intracellular enzyme that converts cAMP to the inactive 5'-AMP. The company has designed and synthesized focused libraries of selective PDE4 inhibitors based on a medicinal natural product isolated in-house.

## Products in Development

### IPL512,602 for Asthma

IPL512,602, is a selective inhibitor of leukocyte trafficking in inflamed airways derived from the company's LSAIDs. It has the potential to be a once a day oral therapy for the treatment of asthma.

IPL512,602 Clinical Trials: The company completed the Phase IIb asthma study in moderate to severe patients.

### IPL455,903 for Learning and Memory Disorders

IPL455,903 is the subject of a limited license agreement with Helicon in learning and memory disorders. The company completed Phase IIa clinical trial.

## Research Programs

### PDE Inhibitors for Inflammation

Inhibitors of PDE4 have been shown in in vitro studies to block activation of various cell types involved in inflammation through elevation of intracellular cAMP in the target cell. These inhibitors have shown efficacy in various pre-clinical models of inflammatory disease and other companies have demonstrated clinical proof-of-concept in various indications, including asthma, chronic obstructive pulmonary disease (COPD) and inflammatory bowel disease.

## License Agreements

University of British Columbia and University of Alberta: Under a license agreement, the company has a worldwide license from the University of British Columbia and the University of Alberta to technology covering certain LSAIDs. The company has right to

use and sublicense the technology contained in this license agreement for anti-inflammatory and antithrombotic uses, and to manufacture, distribute and sell products on the terms contained in the license agreement.

AVANT Immunotherapeutics, Inc.: Adprotech entered into a license agreement with AVANT that confers rights to use certain components of AVANT's intellectual property relating to CR1 (from which Mirococept is derived).

### Business Relationships

In 2006, the company entered into a research collaboration agreement with BioSeek, Inc. (BioSeek), which engages in applying integrated human biology systems for developing new therapeutics. The analysis phase was completed in December 2006 with the identification of a cellular pathway apparently inhibited by IPL512,602 involved in inflammatory processes.

### Corporate Partnerships

Research and development agreement with Helicon Therapeutics, Inc.: In 2000, the company entered into a research and limited license agreement with Helicon under which they would explore the potential of certain small molecule anti-inflammatory compounds from its PDE4 inhibitor portfolio in the field of learning and memory. Under this agreement, Helicon evaluated various Inflazyme's PDE4 inhibitor compounds in its in vivo models of learning and memory.

### Competition

The company's competitors include AstraZeneca PLC, Novartis AG, GlaxoSmithKline PLC, sanofi-aventis, Merck & Co., Altana AG and Sepracor, Inc.

### History

Inflazyme Pharmaceuticals, Ltd. was incorporated in 1980.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same

price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
