company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Eastern Platinum Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Eastern Platinum Limited business.

About Eastern Platinum Limited

Eastern Platinum Limited engages in the acquisition, exploration, development, and production of Platinum Group Metals (PGM).

The company has interests in four PGM projects in the western and eastern limbs of the Bushveld Complex (BC) in South Africa: Crocodile River Mine (CRM), the Kennedy's Vale Project; the Spitzkop PGM Project; and the Maresburg PGM Project. The company also holds an interest in a non-producing oil and gas well located in Alberta.

Mineral Properties

Kennedy's Vale/Spitzkop Project

The Kennedy's Vale/Spitzkop Project is situated on the eastern limb of the Bushveld Complex and the closest towns are Steelpoort, Burgersfort and Lydenburg (70 km east). The Project is 350 km northeast from Johannesburg and comprises the farm Spitzkop 333KT, Kennedys Vale 361KT, De Goedeverwachting 332KT, Belvedere 362KT and portions of the farms Tweefontein 360KT and Boschkloof 331KT.

Crocodile River Mine (CRM)

CRM is a platinum group metals mine located on the Bushveld Complex in South Africa, where the major orebody is the UG2 reef. The mine is situated on the western limb of the Bushveld Complex in an area of known structural complexity, the Brits Graben. CRM is located approximately 70 km north-northwest of Johannesburg in the North West Province and approximately 7 km south of the town of Brits. The mine lease area includes two operating mining sections namely the Zandfontein and Maroelabult sections, while other sections, Crocette, Krokodildrift and Kareespruit, are under investigation.

Mareesburg PGM Project

The 2,129 ha Mareesburg property lies in the southern part of the eastern limb of the BC. The farm Mareesburg 8JT is located 50 km to the west of the large town of Lydenburg in the Lydenburg Magisterial District, Limpopo Province in the Republic of South Africa.

History

Eastern Platinum Limited was founded in 1989.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
