Such information creates your awareness about principal trends of EastPharma Ltd business.

About EastPharma Ltd

EastPharma Ltd., a pharmaceutical company, engages in the manufacture and marketing of licensed and branded generic pharmaceutical products primarily in Turkey. The company has 111 pharmaceutical molecules in 253 pharmaceutical forms ranging from antimicrobial agents to antineoplastics and antihypertensives. Of these 17 molecules are licensed molecules in 28 presentation forms.

Segments

The company classifies its operations into five business segments: Production and Sale of Human Pharmaceuticals, Active Pharmaceutical Ingredient (API) Manufacturing, Veterinary Products, Consumer Goods, and Others.

Human Pharmaceuticals

The Human Pharmaceuticals segment sells branded generic and licensed products. Branded generic products are finished pharmaceutical products that Deva produces and sells under its trademarked name. Licensed products are finished pharmaceutical products that the company produces and sells under licenses from other pharmaceutical companies that hold the rights to the pharmaceutical compound. The

business encompasses a range of medicines combating diseases in the musculoskeletal, alimentary, metabolism and cardiovascular system, and infections.

Active Pharmaceutical Ingredient (API) Manufacturing

API Manufacturing segment manufactures and sells antibiotic active ingredients to local producers, including the company's other subsidiaries, as well as to foreign pharmaceutical companies. In addition to its manufacturing activities, a subsidiary of the company conducts, at its microbiology laboratories, tests and research on the adaptation of raw materials, selection of micro-organisms, formulation of culture mediums, and executes various test, and research fermentations on pilot fermentators.

Veterinary Products

The Veterinary Products sells products that meet the needs of veterinarians and animal breeders. It has 76 registered products and 122 presentation forms.

Consumer Goods

The operations in the consumer goods segment include empty ampoules and hygienic products.

Other

Other segment consists of catering and insurance business of the company.

Agreements

In 2008, the company signed a License and Supply Agreement allowing EastPharma SARL to license an additional eight Roche products for Turkey.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
