Abstracts

Ecoloclean Industries Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Ecoloclean Industries Inc. and its competitors. This provides our Clients with a clear understanding of Ecoloclean Industries Inc. position in the Industry.

The report contains detailed information about Ecoloclean Industries Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Ecoloclean Industries Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Ecoloclean Industries Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Ecoloclean Industries Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Ecoloclean Industries Inc. business.

About Ecoloclean Industries Inc.

Ecoloclean Industries, Inc. engages in the manufacture of machines for the treatment of contaminated water through a process, known as electrocoagulation.

Electrocoagulation System

The company has designed and manufactured three portable EC Units which are mounted within or on enclosed trailers. The waste water is pumped into the EC unit, electrochemically processed and discharged on-site.

The water flows through a series of engineered electrodes within a cell while a controlled electric current is applied to the waste water. The electrical energizes the solution creating a magnetic field within the cell. The company's system is designed to optimize approximately 20 variables in order to transfer electrical energy to the continuously flowing contaminated waste water. Water contaminated mixtures created by the electro coagulation process, separate into an organic molecule floating layer known as flocculent, a mineral sediment and clean water. This separation occurs within minutes of treatment and conventional equipment might be used to extract the clean water. The Electro coagulation process has treated animal and human waste water removing chemical and biological contaminants. Tests confirm the destruction of coli

form bacteria, flagellates, helminthes, eggs, infective parasite larvae and enteric viruses.

The company's EC process utilizes proprietary and patented technologies applying electrochemical energies to the waste water stream. Contaminant laden water moves through an electric field where the treatment is accomplished by Ionization; Electrolysis; Free radical formation; and Electromagnetic fields.

Applications

The applications of the company's system includes Ground water cleanup Process rinse and wash water; Potable water o Sewage treatment; Cooling towers o Radioactive isotope removal; Pretreatment for reverse osmosis, ultra-filtration, nano-filtration, and photocatlytics; Water reuse resulting in zero discharge; Metal recovery; Influent quality water control; and Industrial waste water.

Operations and Services

Industrial and commercial businesses produce various types of wastewater (including hydrocarbon contaminated water from oil field operations that must be disposed of as required by federal, state and local regulations. The company intends to process the liquid waste and remove contaminants and dispose of the treated liquid waste as required by applicable regulations.

Oilfield Waste

Oilfield waste consists primarily of petroleum-based and water-based drilling fluids (which contain oil, grease, chlorides and heavy metals), as well as cuttings, saltwater, work over and completion fluids, production pit sludges and soil containing these materials.

Subsidiaries

The company operates six corporations. It owns three wholly owned subsidiaries, including Ecoloclean, Inc., and Reliant Drilling Systems, Inc., and Aquatronics Industries, Inc. Ecoloclean, Inc. owns two wholly owned subsidiaries, World Environmental Technologies, Inc., and Ecoloclean of Texas, Inc.

The company acquired Aquatronics Industries, Inc. in September 2005. Aquatronics

provides solutions to commercial and industrial customers with remediation equipment and services for the removal of impurities and waste by-products.

In 2005, Reliant Drilling Systems, Inc. and Ecoclean of Texas, Inc. discontinued their operations.

Customers

The Company provides its products and services to the petroleum exploration, petroleum, chemical, transportation, and refining industries.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
