Abstracts

Ecology & Environment, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Ecology & Environment, Inc. and its competitors. This provides our Clients with a clear understanding of Ecology & Environment, Inc. position in the [Commercial Services and Supplies](#) Industry.

The report contains detailed information about Ecology & Environment, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Ecology & Environment, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Ecology & Environment, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Ecology & Environment, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Ecology & Environment, Inc. business.

About Ecology & Environment, Inc.

Ecology and Environment, Inc. operates as an environmental consulting company. The company has completed approximately 50,000 projects for a variety of clients in 96 countries.

Environmental Consulting Services

The company offers consulting services to commercial and government clients in a variety of service sectors.

Energy

The company supports all phases of energy development by conducting critical feature/fatal flaw analyses, environmental impact assessments, feasibility and siting studies, and permitting.

Electric Transmission

The company works with energy industry clients through all aspects of development,

generation, and transmission. It performs site screening and alternative selection; analyzes environmental impacts; and acquires needed certificates, approvals, and permits for electric transmission facilities worldwide to bring renewable energy from its source to regional population centers.

Pipelines

The company's services includes route selection; field support and survey, such as wetland delineation and endangered species surveys; regulatory compliance and permit support, including preparation of erosion control plans for submission to state agencies, Section 10 of the Rivers and Harbors Act and Section 404 of the Clean Water Act permits for submission to the United States Army Corps Engineers, and Federal Energy Regulatory Commission (FERC) 7(c) filings; and preparation of environmental monitoring and restoration plans, including development of quality assurance specifications.

Unconventional Natural Gas Development

The company responds to industry requirements for permitting well development and takes away pipelines required to move shale gas to market. The company works in the Marcellus and Barnett Shale Gas Reserves.

Offshore Energy

The company supports projects involving oil and gas exploration and production; subsea pipelines; deepwater oil ports; liquefied natural gas (LNG) import terminals; and projects involving components of offshore wind, wave, current, and tidal power subsea electrical transmission. The company prepares third-party EISs/EIAs, Deepwater Port applications, and FERC ERs; performs siting/feasibility studies, plankton surveys, marine mammal acoustic impact modeling, dredging impact studies, coastal zone consistency evaluations, risk assessments, and marine vessel traffic studies; and develops and implements plans for stakeholder engagement/outreach.

Wind Energy

The company provides strategic consulting in all facets of environmental permitting and compliance; environmental evaluation; T/E species, avian, and bat surveys; and visual resources, noise aesthetics, archaeological, and land use studies. The company's civil engineering support services include design of structure foundations and roadways and

coordination for gathering line placement, substation, and transmission line requirements.

Solar Energy

The company supports all phases of solar energy development by providing strategic consulting services. It conducts environmental impact assessments, feasibility and siting studies, permitting and due diligence audits; prepare environmental documentation and permit applications; and identify and track state and federal compliance issues affecting facility development and operation.

Geothermal Energy

The company offers planning and consulting services to address environmental and socioeconomic impacts associated with geothermal energy development.

Nuclear Energy

The company helps clients through the environmental hurdles of the licensing process by performing siting studies and environmental investigations and preparing environmental reports.

Carbon Capture and Sequestration

The company assists its clients to navigate the deregulated power industry and expedite the permitting process with an understanding of the environmental and regulatory requirements (federal and state) associated with carbon capture and sequestration (CCS), including geologic investigation, deep well construction, power plant, and pipeline siting and construction and long-term CO₂ storage.

Natural Resource Management/Restoration

The company conce

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
