The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Ecuity Inc. business.

About Ecuity Inc.

Ecuity, Inc. provides telecommunications and high-speed data services using both Voice over Internet Protocol (VoIP) delivery and traditional, legacy telephone switched networks. The ECUITY legacy service business includes 800 service, 1 Plus (long distance) services, Internet Dial-Up Services, Web-Hosting and Digital Subscriber Line (DSL) broadband Internet services. It serves primarily the small and medium sized business and home office markets and selected residential markets.

With respect to its VoIP service offering ECUITY provides VoIP telephone services and high speed data services, to businesses and residences over high-speed fiber optic networks and other selected high speed broad band networks. Ecuity's voice and data services focus on quality of service (QOS) and advances calling features.

Market

The primary potential growth market for the company's services is the sale of VoIP telephone services, high-speed data services and related emerging Internet based services. These are marketed through its wholly owned subsidiary Ecuity Advanced Communications, Inc., (EAC). The company also provides business and residential long distance telephone service, Internet dial up, DSL, T 1 connectivity, web hosting services, and VoIP.

In addition, the company also provides the following telecommunication services: Internet Services, Dial-Up Services, Dedicated Access, DSL Service, ISDN Service, Email Account, Web Hosting, Long Distance, and WiFi Hotspots.

Competition

The company's competitors include AT&T, Sprint, Verizon, Allegiance, SBC, Qwest, Vonage, and Skype. Competition is also expected from cable companies such as Comcast, Charter, Cox, as well as telecommunications companies with cable operations and operating agreements, including SBC and Qwest and Internet and Internet related service providers such as AOL and eBay. In addition, enterprise software companies are direct and potential competitors in the development and provisioning of value-added services over telecommunications platforms, including IBM, SAP, Oracle, BAE and Microsoft.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
