Abstracts

EDF Energies Nouvelles S.A. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between EDF Energies Nouvelles S.A. and its competitors. This provides our Clients with a clear understanding of EDF Energies Nouvelles S.A. position in the [Utilities](#) Industry.

The report contains detailed information about EDF Energies Nouvelles S.A. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for EDF Energies Nouvelles S.A.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The EDF Energies Nouvelles S.A. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes EDF Energies Nouvelles S.A. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of EDF Energies Nouvelles S.A. business.

About EDF Energies Nouvelles S.A.

EDF Energies Nouvelles S.A. engages in the construction, operation, and maintenance of power generation plants. The company operates in the renewable energies market, with a particular emphasis on green electricity generation.

In addition to its electricity generation activities, the company engages in the development and sale of structured assets, which consists in building wind and solar energy projects for third parties.

As of December 31, 2008, the company possessed installed capacity of 2,275.3 MW, of which 1,564.4 MW was held for its own account. In addition, it had a portfolio of projects under development representing approximately 16,800 MW in total capacity and 919.9 MW (including 587.7 MW held for its own account) under construction.

WIND ENERGY

Wind energy is the company's principal activity. As of December 31, 2008, it operated 2,030.6 MW of installed wind energy capacity. In addition, it had a development pipeline of wind energy projects representing total capacity of close to 14,500 MW, including 887.8 MW under construction (560.2 MW of which is due to be held for its own

account).

Europe: In Europe, the company operates in eight countries, primarily in France and southern Europe (Portugal, Italy, Greece, Turkey), also in the United Kingdom, Germany and Belgium.

North America: In addition to Europe, the company established in North America, primarily in the United States and also in Canada and Mexico.

SOLAR PHOTOVOLTAIC

The Group is primarily targeting two markets: firstly, the development of ground-based photovoltaic plants and, secondly, the development of building-integrated power plants in the countries in which it is active (France, Italy, Spain, Greece, the United States and Canada), both for its own account and for third parties.

The company's suppliers include First Solar, United Solar Ovonic and Sunpower in the United States, Photowatt International in France, and Solarfun, Yingli Green Energy and Suntech in China.

As of December 2008, the company had a photovoltaic power plant portfolio of approximately 2,000 MWp in projects under development, including 29.1 MWp under construction. In addition, it had 20.8 MWp in installed capacity.

Europe: As of December 31, 2008, the company had 13 power plants in service in Europe with installed capacity totalling 19.2 MWp (including 11.3 MWp held for its own account). In addition, it had a portfolio of facilities under construction in Europe with capacity totalling 26.4 MWp. It had three photovoltaic power plants in service in France, with aggregate capacity of 7.4 MWp.

In July 2008, EDF Energies Nouvelles Reparties acquired through Photon Power Industries (PPI) a 25.7% shareholding in Silicium de Provence (SilPro) alongside Dutch group Econcert and German solar photovoltaic panel manufacturer Solon.

During 2008, the company launched the construction of a 10.5 MWp photovoltaic power plant on Reunion Island. In 2008, the company also began building a 2 MWp photovoltaic power plant in the Landes region of south-western France, in partnership with solar tracker manufacturer Exosun.

In addition, during January 2009, the company acquired an additional shareholding of 31% in Photon Power Technologies, a French company developing photovoltaic projects, in which it has owned a 20% stake.

Italy: As of December 31, 2008, the company had 7 photovoltaic facilities in service in Italy with capacity totalling 5.7 MWp, which are owned in partnership with a local operator.

Spain: During 2008, the company commissioned 4 photovoltaic power plants in Spain, representing total capacity of approximately 8 MWp.

Greece: As of December 31, 2008, the company is in the process of building a photovoltaic facility with 6 MWp in capacity at Xirokambi in the Peloponnese.

The United States: During 2008, the company commissioned 3 photovoltaic power plants in the United States with aggregate capacity of 1.6 MWp.

HYDRO

As of December 31, 2008, the company operated 128.4 MW of installed hydro capacity (101.4 MW for its own account). EDF Energies Nouvelles operated seven hydro plants, one in the Rhone Valley, four in Corsica and two i

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
