Abstracts

EESTech, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between EESTech, Inc. and its competitors. This provides our Clients with a clear understanding of EESTech, Inc. position in the Industry.

The report contains detailed information about EESTech, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for EESTech, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The EESTech, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes EESTech, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of EESTech, Inc. business.

About EESTech, Inc.

EESTech, Inc., a development stage company, provides solutions utilizing 'economically and environmentally sustainable technologies' (EEST).

PRODUCT AND TECHNOLOGY SOLUTIONS

The company is engaged in promoting the commercialization of its three primary products: a Hybrid Coal and Gas Turbine (HCGT) power plant; Carbon Capture and Storage (CCS) and the JetWater System (JWS). These are economic and environmentally sustainable technologies that are being introduced to markets in Australia, the People's Republic of China, South America, the United Arab Emirates and the United States.

JetWater System

The company owns the JetWater System (JetWater), an evaporation-based technology for water purification. The JetWater technology is used for the recovery of near ultra pure quality water (distilled water) from a range of water and wastewater sources. The JetWater System purifies and desalinates seawater, brackish groundwater, treated sewage effluent and other types of wastewater to produce near ultra-pure quality fresh

water.

The JetWater System provides solutions to customers who wish to purify, desalinate or reuse water from various sources. The JetWater System is based on a modular design. The production capacity of each module is 0.5 ML per day. The JetWater System uses electrical power as its main energy supply.

The principal markets for the JetWater System are centered upon providing environmental solutions to problematic wastewater issues. Its specific applications include - Mine sites (with surplus saline mine water and processing water); Pulp mills and wood pulp products; Mineral processing; Power generation; Food manufacture; Municipal landfill leachate; and other water desalination processes (reverse osmosis). In addition, the company has also identified two market opportunities for JetWater, which include United Arab Emirates and the Persian Gulf Region and market synergies with the HCGT system.

Hybrid Coal and Gas Turbine

The Hybrid Coal and Gas Turbine (HCGT) use biomass or a combination of fugitive methane from underground coal mines and waste coal as the fuel source to generate between 5 megawatts and 30 megawatts of electric power, per generating module. The HCGT plant enables coal miners to produce electric power using various fuel sources, such as ventilation, air methane, coal mine methane and waste coal.

The HCGT technology has various applications both in Australia and internationally. It provides a capability to utilize vent air methane or coal mine methane with waste coal or biomass fuels.

Carbon Capture and Storage

In November 2007, the company acquired a license from HTC Hydrogen Technologies Corp (HTC) to commercialize the Carbon Capture and Storage technology (CCS). The license would enable the company to commercialize the CCS technology in The People's Republic of China, India and the Asia Pacific region (including Australia, New Zealand, Malaysia, Singapore, Brunei, Indonesia, the Philippines, Thailand and Japan).

Significant Events

The company and Aryan Clean Coal Technologies, a wholly owned subsidiary of Aryan

Coal Beneficiations Pvt., Ltd. of India, have entered into an agreement to establish a joint venture company to introduce three 10 mega watt HCGT (Hybrid Coalmine Gas Technology) power plants to the underground coal mines of India.

On April 7, 2009, EESTech, Inc. has signed a joint venture agreement with Aryan Clean Coal Technologies of India, to install three 10-mega watt Hybrid Coal Gas Technology systems over the next five years.

History

The company was founded in 2000. It was formerly known as Aqua Dyne, Inc. and changed its name to EESTech, Inc. in 2006.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
