The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes El Paso Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of El Paso Corp. business.

About El Paso Corp.

El Paso Corporation, an energy company, operates in the natural gas transmission and exploration, and production sectors of the energy industry.

Segments

The company's operations are conducted through two core segments, Pipelines and Exploration and Production. The company also has Marketing and Power segments.

Pipelines segment

The Pipelines segment includes its interstate natural gas transmission systems and related operations conducted through seven separate, wholly or majority owned pipeline systems, and four partially owned systems. These systems connect the nation's principal natural gas supply regions to the five regions in the United States: the Gulf Coast, California, the northeast, the southwest, and the southeast. The company also has access to systems in Canada and assets in Mexico. Its Pipelines segment also includes its ownership of storage capacity through its transmission systems, three underground natural gas storage facilities, and two LNG terminalling facilities one of which is under construction.

The company owns or has interests in North America's interstate pipeline system with approximately 42,000 miles of pipe that connect North America's major natural gas producing basins to its major consuming markets. The company also provides approximately 230 Bcf of storage capacity and has an LNG receiving terminal and related facilities in Elba Island, Georgia with 933 MMcf of daily base load sendout capacity.

Liquefied Petroleum Gas Pipeline System: The company operates the LPG Burgos pipeline. This 117 mile pipeline, in which it owns 50 percent, transports liquefied petroleum gas and extends from Pemex's Burgos to the Monterrey market in the state of Nuevo León, Mexico.

WYCO Development Company (WYCO): The company owns a 50 percent interest in WYCO, a joint venture with an affiliate of Public Service Company of Colorado (PSCo). The High Plains pipeline consists of a 164-mile interstate gas pipeline extending from the Cheyenne Hub in northeast Colorado to PSCo's Fort St. Vrain electric generation plant and other points of interconnections with PSCo's system. The Totem Gas Storage facility interconnects with the High Plains Pipeline and has 6 Bcf of working natural gas storage capacity, with a maximum withdrawal rate of 200 MMcf/d and a maximum injection rate of 100 MMcf/d. WYCO also owns a state regulated intrastate gas pipeline that extends from the Cheyenne Hub in northeast Colorado to PSCo's Fort St. Vrain's electric generation plant, which the company does not operate, and a compressor station in Wyoming that the company operates.

Underground Natural Gas Storage Facilities: In addition to the storage capacity in its wholly and majority owned pipeline systems, the company has interests in various natural gas storage facilities, including Bear Creek and Young Gas Storage.

Master Limited Partnership: As of December 31, 2009, the company's master limited partnership, El Paso Pipeline Partners, L.P. (EPB), owns the Wyoming Interstate system, a 58 percent general partner interest in Colorado Interstate Gas (CIG) and a 25 percent general partner interest in Southern Natural Gas (SNG). As of December 31, 2009, the company had a 2 percent general partner interest and a 65 percent limited partner interest in EPB.

LNG Facilities

Elba Island LNG: The company owns an LNG receiving terminal located on Elba Island,

near Savannah, Georgia with a peak sendout capacity of 1.2 Bcf/d and a base load sendout capacity of 0.9 Bcf/d. The capacity at the terminal is contracted with subsidiaries of British Gas Group and Royal Dutch Shell PLC.

Gulf LNG: The company owns a 50 percent interest in the Gulf LNG Clean Energy Project, which is constructing a LNG terminal in Pascagoula, Mississippi with a designed sendout capacity of 1.5 bcf/d.

Markets: Pipelines segment provides natural gas services to various customers, including natural gas producers, marketers, end-users, and other natural gas transmission, distribution and electric generation companies.

Exploration and Production segment

The Exploration and Production segment's business focuses on the exploration for and the acquisition,

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
