The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Electric Moto Corp. business.

About Electric Moto Corp.

Electric Moto Corporation engages in the design, manufacture, distribution and sale of recreational and special purpose electric and hybrid vehicles throughout the world. It offers motorcycles and all-terrain vehicles (ATVs). The company's products target existing buyers and dealers. Its operations include chassis and component manufacturing, serial production, assembly, marketing and distribution of vehicles. The company designs vehicles that are energy efficient, practical, environmentally friendly (quiet and non-polluting), and suitable for recreational, military and homeland security applications.

Products

Blade: The Blade is its flagship product. Powerful enough to run with noisier 250cc motorcycles, The Blade allows its owner to enjoy high powered yet silent motoring in places where no gas powered cycle would be allowed to run. The Blade is well known in motocross circles and has been sold worldwide.

Motard: The Motard is extremely lightweight causing less fatigue and allowing faster and more accurate maneuvers, both valuable advantages, especially in extreme competitions.

Hybrid Vehicles: In addition to pure electric vehicles, the company also offers hybrid (gas and electric) powered vehicles in both two and four wheeled versions. Its hybrid models offer an extended range, as well as providing both ultra quiet and silent modes. Equipped with a rugged gasoline powered generator, the company's hybrids move customer quietly to their destination at a 59db with the generator running and silently in electric only mode.

iHYBRID ATV: This multi-purpose ATV offers quiet power with a range of up to 5 hours using its top rated high output generator and electric power system. Even while operating with the generator running, this vehicle would allow the user to access many areas prohibited by noisier gasoline powered vehicles. They also have the added advantage of bringing with them, an independent 120v power source that can be used for powering tools, light and communications equipment to name just a few of the many uses available to the iHybrid ATV owner. Its iHybrid ATV operates at an ultra quiet 59db while the gas powered ATV struggles to meet new noise abatement laws.

The Hybrid Blade: The Hybrid Blade offers quiet power with a range of up to 5 hours using its top rated high output generator and electric power system. Even while operating with the generator running, this vehicle would allow the user to access many areas prohibited by noisier gasoline powered vehicles. They also have the added advantage of bringing with them, an independent 120v power source that can be used for powering tools, light and communications equipment to name just a few of the many uses available to the Hybrid Blade owner. Its Hybrid Blade operates at an ultra quiet 59db. The power unit can be quickly and easily disconnected from the Blade allowing motocross riding between charges.

History

The company was originally incorporated under the laws of the State of Nevada in 2000 under the name Dorado Capital Ventures, Inc. and changed its name to Electric Moto Corporation in July 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
