Abstracts

Elster Group SE Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Elster Group SE and its competitors. This provides our Clients with a clear understanding of Elster Group SE position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Elster Group SE that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Elster Group SE. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Elster Group SE financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Elster Group SE competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Elster Group SE business.

About Elster Group SE

Elster Group SE provides gas, electricity and water meters, and related communications, networking and software solutions. The company's products and solutions are used to measure gas, electricity, and water consumption, as well as enable energy efficiency and conservation. It sells its products and solutions to utilities, distributors, and industrial customers in approximately 130 countries across gas, electricity, water, and multi-utility settings for use in residential market and the commercial, industrial, transmission, and distribution settings (C&I) market.

Gas Products and Solutions

In its gas segment, the company offers a range of gas metering and distribution products and solutions for the residential and C&I sectors. Its products and solutions service gas markets from the source of natural gas to consumers. The company's gas metering products are complemented by its utilization products, which comprise process-heating equipment, including burner-control systems for gas-fired industrial heat treatment processes, and heat-control systems for residential and commercial boilers, and by its gas distribution products, which consist of valves, risers, and other gas infrastructure products.

The company's product portfolio includes a range of mechanical and solid state meters (in which mechanical components and electronic devices, respectively, measure the flow of gas) and related components for residential and C&I use and related solutions, such as automated meter reading (AMR), advanced metering infrastructure (AMI), remote flow control, consumption regulation, measurement, and MDM software solutions.

The company's residential meters consist mainly of diaphragm gas meters, which enclose and measure defined volumes of gas in low flow applications (standard AMR- or AMI-enabled). Its C&I meters consist of industrial diaphragm gas meters, suitable for high volumes, rotary gas meters, which have components that rotate to enclose the gas being measured, turbine gas meters, which measure the flow of gas, and ultrasonic gas meters, which use ultrasound technology to measure gas flows. The company also offers meters specific to transmission settings, such as ultrasonic and turbine gas meters.

The company uses a set of customizable communications technologies, which it offers to its customers in different regions. In North America, the company offers EnergyAxis RF mesh (900 MHz) and third-party technology, and in Europe it usually offer wireless networks, including RF technology based on Wavenis and ZigBee and wired networks, including M-Bus and Ethernet.

The company offers its TRACE system, a walk-by and drive-by AMR solution for gas meters using RF communications technology to collect billing information and perform detailed meter readings.

In addition, the company offers repair, calibration, commissioning and maintenance services, as well as project engineering. It also offers gas pressure regulation and communication products, such as low and middle pressure regulators, valves, volume converters, data loggers, flow computers, gas quality measurement, and metering and regulation stations, as well as monitoring systems.

The company markets its gas products under brands, such as Elster American Meter, Elster Kromschroder, Elster Perfection, and Elster Instromet. Its customers include gas exploration and production, gas transmission, gas distribution and general industrial companies, integrators, end-users, power plants, as well as multi-utilities.

The company's gas utilization products consist of process-heating equipment, such as burner-control systems for gas-fired industrial heat treatment processes, and heat-

control systems for residential and commercial boilers. It also offers products for natural and propane gas distribution systems, such as polyethylene piping products, mechanical pipe joining products, and pre-fabricated meter sets that allow connections between gas mains and residential or C&I consumer premises.

Electricity Products and Solutions

The company's electricity segment offers electromechanical and solid state single-phase and polyphase meters, each of which can be equipped wi

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
