Abstracts

EMCOR Group Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between EMCOR Group Inc. and its competitors. This provides our Clients with a clear understanding of EMCOR Group Inc. position in the [Engineering and Construction Services](#) Industry.

The report contains detailed information about EMCOR Group Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for EMCOR Group Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The EMCOR Group Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes EMCOR Group Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of EMCOR Group Inc. business.

About EMCOR Group Inc.

EMCOR Group, Inc. provides electrical and mechanical construction and facilities services worldwide. The company provides services to a range of commercial, industrial, utility and institutional customers through approximately 75 operating subsidiaries and joint venture entities.

The company focuses on providing construction services relating to electrical and mechanical systems in facilities of all types. It provides services for the operation, maintenance and management of various aspects of such facilities, commonly referred to as facilities services.

The company designs, integrates, installs, start-up, operates, and maintains various electrical and mechanical systems, including electric power transmission and distribution systems; premises electrical and lighting systems; low-voltage systems, such as fire alarm, security and process control systems; voice and data communications systems; roadway and transit lighting and fiber optic lines; heating, ventilation, air conditioning, refrigeration and clean-room process ventilation systems; fire protection systems; plumbing, process and piping systems; water and wastewater treatment systems; and central plant heating and cooling systems.

The company's facilities services businesses, which support the operation of a customer's facilities, include industrial maintenance and services; outage services to utilities and industrial plants; commercial and government site-based operations and maintenance; military base operations support services; mobile maintenance and services; facilities management; installation and support for building systems; technical consulting and diagnostic services; small modification and retrofit projects; retrofit projects to comply with clean air laws; program development, management and maintenance for energy systems; and shop and on-site field services for refineries and petrochemical plants.

These facilities services are provided to a range of commercial, industrial, utility and institutional facilities, including those to which the company also provides construction services and others to which construction services are provided by others. The company provides construction services and facilities services directly to corporations, municipalities and other governmental entities, owners/developers, and tenants of buildings. It also provides these services indirectly by acting as a subcontractor to general contractors, systems suppliers, property managers and other subcontractors.

Operations

The company provides electrical and mechanical construction services for both large and small installation and renovation projects. Its projects include those for institutional use, such as water and wastewater treatment facilities, hospitals, correctional facilities, and research laboratories; for industrial use, such as pharmaceutical plants, steel, pulp and paper mills, chemical, food, automotive and semiconductor manufacturing facilities and oil refineries; for transportation projects, such as highways, airports and transit systems; for commercial use, such as office buildings, data centers, hotels, casinos, convention centers, sports stadiums, shopping malls and resorts; and for power generation and energy management projects.

The company performs services pursuant to contracts with owners, such as corporations, municipalities and other governmental entities, general contractors, systems suppliers, construction managers, developers, other subcontractors and tenants of commercial properties. It also installs and maintains lighting for streets, highways, bridges and tunnels, traffic signals, computerized traffic control systems, and signal and communication systems for mass transit systems in metropolitan areas. In addition, in the United States, the company manufactures and installs sheet metal air handling systems for both its own mechanical construction operations and for unrelated mechanical contractors. The company also maintains welding and pipe fabrication

shops in support of its mechanical operations.

The company's United States facilities services and other segments, provide facilities services to a range of commercial, industri

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
