Abstracts

Emerson Electric Co. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Emerson Electric Co. and its competitors. This provides our Clients with a clear understanding of Emerson Electric Co. position in the [Electrical Equipment](#) Industry.

The report contains detailed information about Emerson Electric Co. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Emerson Electric Co.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Emerson Electric Co. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Emerson Electric Co. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Emerson Electric Co. business.

About Emerson Electric Co.

Emerson Electric Co. engages in designing and supplying product technology, as well as delivering engineering services and solutions to various industrial, commercial, and consumer markets.

Segments

The company's segments include Process Management; Industrial Automation; Network Power; Climate Technologies; and Appliance and Tools.

PROCESS MANAGEMENT

The Process Management segment offers customers product technology; engineering; and project management services for precision control, monitoring and asset optimization of oil and gas reservoirs and plants that produce power or that process or treat such items as oil, natural gas, and petrochemicals; food and beverages; pulp and paper; pharmaceuticals; and municipal water supplies.

Process Management Systems and Software

Process Management Systems and Software control plant processes by collecting and analyzing information from measurement devices in the plant, and uses that information to adjust valves, pumps, motors, drives, and other control hardware.

Measurement and Analytical Instrumentation

Measurement instrumentation measures the physical properties of liquids or gases in a process stream, such as pressure, temperature, level, or rate and amount of flow, and communicates the information to the control system. The company's measurement technologies include Coriolis direct mass flow, magnetic flow, vortex flow, ultrasonic flow, differential pressure, ultralow-flow fluid measurement, temperature sensors, and radar-based tank gauging. Measurement products are also used in custody transfer applications, such as the transfer of gasoline from a storage tank to a tanker truck, where precise metering of the amount of fluid transferred helps asset management.

Valves, Actuators, and Regulators

The company provides sliding stem valves, rotary valves, butterfly valves, and related valve actuators and controllers. It also provides a line of industrial and residential regulators, whose function is to reduce the pressure of fluids, such as natural gas and liquid petroleum gas for transfer from high-pressure supply lines to lower pressure systems.

PlantWeb Digital Plant Architecture

The company's PlantWeb digital plant architecture combines the technologies of 'intelligent' plant devices, open communication standards, and integrated modular software to collect and analyze information about plant assets and processes.

Industry Services and Solutions

The company's process automation and asset optimization services improve automation project implementation time, increase process availability, and productivity. Global industry centers offer engineering and project management services to help customers extract performance from their process equipment and automation assets. These centers serve industries, such as oil and gas, pulp and paper, chemical, power, food and beverage, and life sciences.

INDUSTRIAL AUTOMATION

The Industrial Automation segment provides integrated manufacturing solutions to its customers at the source of manufacturing their own products. Products include motors, power transmission solutions, alternators, fluid controls, and materials joining equipment.

Motors and Drives

The company provides drives and electric motors that are used in manufacturing operations and products, including production assembly lines, escalators in shopping malls, and supermarket checkout stations. Products in this category include alternating and direct electronic variable speed drives, servo motors, pump motors, drive control systems, integral horsepower motors, fractional horsepower motors, and gear drives.

Power Transmission

The company's Power Transmission products include belt and chain drives, helical and worm gearing, gear motors, motor sheaves, pulleys, mounted and unmounted bearings, couplings, chains, and sprockets which are used to transmit power mechanically in manufacturing and material handling operations and products.

Power Generation

The company provides alternators for use in diesel or gas powered generator sets, as well as frequency alternators, AC motor/generator sets, traction generators, and wind power gene

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
